POLICIES AND PROCEDURES
Effective: January 1, 1992

CREDITS (Continued)

Shortages: Customer must note shortage on delivery receipt. No claims for shortages will be accepted unless customer has so noted on delivery receipt. Customer should also notify ZEUS (or ZEUS Broker) within 24 hours of receipt, so ZEUS can file the appropriate freight claim.

BILLBACKS.

Broker must submit a Billback Request for all Rebates and any allowance money not deducted off invoice. All requests must include a copy of a verifiable ZEUS or distributor invoice from which the billback is being claimed.

Broker must specify if billback is to be paid with credit against future purchase or by check. If a check is requested, Broker must indicate to whom check is to be made payable and where check is to be sent. No billback requests will be accepted after 180 days from the invoice date.

UNPAID INVOICES.

Brokers will be notified by fax or telephone, as necessary, of any customers with unpaid (open) invoices. Brokers will make immediate contact with the customer to determine the reason payment is past due, find out when payment will be mailed, or arrange for pickup of payment or product. Broker will notify ZEUS within 5 days by fax or telephone of payment status.

COMMISIONS

Commission will be paid on the 15th and 30th of the month on paid invoices only. You will be advised by fax or telephone of all unpaid (open) invoices, as necessary.

Remember me next time

Over the past years, models based on Puppet have developed a reputation for reliability and performance. Puppet models are compiled locally on the host to which the puppet binary is run to execute and apply that configuration. The Puppet architecture is described later in this book.

Configuration Language and Resource Abstraction Layer

Puppet uses a declarative language to define your configuration. Terms such as Puppet and Chef are used to describe this type of language. The difference between Puppet and Chef is that Puppet uses a declarative language, which means that you tell Puppet what you want it to do, for example, I declare that a package called `vim` should be installed. Chef uses a procedural language, which means that you tell Chef how to do something, for example, run `yum install vim`. Most configuration tools available today are declarative, including Puppet, Chef, CFEngine, and Bcfg2. They do not HOW you want something done, only the desired end state. For example, most modern operating systems use package management tools that handle dependencies. With Puppet, you can use the same declaration for a package, and Puppet will use `yum` on Red Hat systems and `apt` on Ubuntu systems. Puppet abstracts away the differences between operating systems and package management tools.

Configuration Language

What does a declarative language look like? Let's look at a simple example. We have an application that runs on Red Hat Enterprise Linux. The application server runs on port 8080. The application server should be running at all times. We want to write a configuration that does the following:

- Connects to the repository that contains the application server binary
- Creates a user called `jboss`
- If not, uses the appropriate command for each platform to install `vim`, for example, `apt-get install vim` on Ubuntu and `yum install vim` on Red Hat
- Pulls a binary from the repository and stores it in `/opt/jboss/server.jar`

■ **Note** The world became even more complex when you wanted to upgrade `vim` (if it was already installed) or apply a particular version of `vim`.

Puppet uses a declarative language to describe the desired state of resources. Puppet resources are defined in configuration files called manifests. Each manifest can contain one or more resources. A resource is made up of a type, which is a reference to a resource that is being managed, for example, `service`, `user`, or `package`. Each resource has a title, which is a unique identifier for the resource. The title is used to reference the resource in other parts of the manifest. For example, you can use a `service` resource to start the `httpd` service.

You can see an example of a resource in Listing 1-1.

Welcome to

Windows® Fax and Scan

One place to scan and fax your documents

FAX: You can send and receive faxed documents on your computer without using a fax machine. You can also print, e-mail, or save a copy of your faxes.

To get started:

1. Connect a phone line to your computer.

   If your computer needs an external modem, connect the phone to the modem, and then connect the modem to your computer.

2. On the toolbar, click **New Fax.**

3. Follow the instructions in the setup wizard to connect to a fax modem, and then, when you're finished, create your fax.

To connect to a fax server instead of a modem, contact your system administrator. For more help with faxing, click the **Help** button on the toolbar.

SCAN: After you add a scanner to your computer, you can preview documents or pictures before you scan them, and then adjust your scan settings for better results. You can also fax or e-mail scanned files to someone else.

To get started:

1. Connect your scanner to your computer by following the instructions that came with your scanner, and then place a document, or picture on the scanner.

2. In Windows Fax and Scan, in the lower-left of the left pane, click **Scan.**

3. On the toolbar, click **New Scan.**

4. Choose the scan settings you want to use, and you're ready to scan.

Use the options on the toolbar to fax, e-mail, print, or copy scans at any time. For more help with scanning, click the **Help** button on the toolbar.

1. Use the 'Print' button on this page to print your label to your laser or inkjet printer.
2. Fold the printed page along the horizontal line.
3. Place label in shipping pouch and affix it to your shipment so that the barcode portion of the label can be read and scanned.

Warning: IMPORTANT: TRANSMIT YOUR SHIPPING DATA AND PRINT A MANIFEST.
At the end of each shipping day, you should perform the FedEx Ground End of Day Close procedure to transmit your shipping data to FedEx. To do so, click on the Ground End of Day Close button. If required, print the pickup manifest that appears. A printed manifest is required to be tendered along with your packages if they are being picked up by FedEx Ground. If you are dropping your packages off at a FedEx drop off location, the manifest is not required.

Use of this system constitutes your agreement to the service conditions in the current FedEx Service Guide and applicable tariff, available upon request. FedEx will not be responsible for any claim in excess of $100 per package, whether the result of loss, damage, delay, non-delivery, misdelivery, or misstatement, unless you declare a higher value, pay an additional charge, document your actual loss and file a timely claim. Limitations, including limitations on our liability, can be found in the current FedEx Service Guide and applicable tariff apply. In no event shall FedEx Ground be liable for any special, incidental, or consequential damages, including, without limitation, loss of profit, loss to the intrinsic value of the package, loss of use, interest, income or attorney's fees. Recovery cannot exceed actual documented loss. Items of extraordinary value are subject to separate limitations of liability set forth in the Service Guide and tariff. Written claims must be filed within strict time limits, see current FedEx Service Guide.

SIGNALS — INTERLOCKINGS

At Portage, eastward automatic block signal 178-II, located approximately 3600 feet east of the depot, has three units, the upper unit of light is an automatic block signal, the two lower units of lights are ripping signals. The middle unit of light governs movements from the eastward to the westward main track through the hand operated cross over located approximately 500 feet east of the signal. The lower unit of light governs movements from the eastward track to the yard through the hand operated crossovers located approximately 500 and 750 feet west of the signal. Movements through the crossovers must be made at restricted speed.

SWITCH POSITIONS

At New Lisbon, the normal position for the Treating Plant Switch on the east leg of the wye is for movements on the east leg of the wye.

MOVEMENT OVER PUBLIC CROSSINGS

At Tomah, when switching over Sinto Ave., crews must operate manual cut-out on crossing signals to avoid excessive operation of crossing gates.

7. PHYSICAL EXAMINATION: Height ____ (in.) Weight ____ (lbs.) Name: Last, First, Middle

The presence of a certain condition may not necessarily disqualify a driver, particularly if the condition is controlled adequately, is not likely to worsen or is treated by amenable to treatment. Even if a condition does not necessarily disqualify, the medical examiner may consider deferring the driver temporarily. Also he/she should be advised to take the necessary steps to correct the condition as soon as possible particularly if the condition if neglected could result in some serious illness that might affect driving.

Check YES if there are any abnormalities. Check NO if the body system is normal. Discuss any YES answers in detail in the space below and indicate whether it would affect the driver's ability to operate a commercial motor vehicle safely. Enter applicable item number before each comment. For any disease in remission, state date it was last treated and whether it has been compensated for. See *Instructions to the Medical Examiner* for guidance.

BODY SYSTEM	CHECK FOR:	YES	NO
1 General Appearance	Marked overweight, tremor, signs of alcoholism, problem drinking, or drug abuse		
2 Eyes	Pupillary equality, reaction to light, accommodation, vision, muscle imbalance, extraocular movement, nystagmus, exophthalmos. Ask about retinopathy, cataract, glaucoma, macular degeneration and refer if a concern if appropriate		
3 Ears	Hearing, perforation of tympanic membrane, occlusion of external canal, perforated eardrums		
4 Mouth and Throat	Dentures, malocclusion, poor dentition, condition of oropharynx, enlarged tonsils, any condition likely to interfere with breathing or swallowing		
5 Heart	Murmurs, extra sounds, enlarged heart, pacemaker, implantable defibrillator		
6 Lungs and chest, not including breast examination	Abnormal chest wall expansion, asymmetry, dyspnea, respiration rate, abnormal breath sounds including wheezes or alveolar rales, impaired respiratory function, cyanosis. Abnormal findings on physical exam may require further testing such as pulmonary function test or x-ray of chest		

BODY SYSTEM	CHECK FOR	YES	NO
7 Abdomen and Viscera	Enlargement, organ dysfunction, masses, hernia, significant abdominal wall muscle weakness		
8 Vascular System	Abnormal pulse, bruits, aneurysm, arterial or venous insufficiency, varicose veins		
9 Genitourinary System	Hernia		
10 Extremities, Limb Impairment. Does the individual have any limb impairment that interferes with or limits the ability to perform normal tasks associated with operating a commercial motor vehicle? If so, explain.	Loss or impairment of leg, foot, toe, arm, hand, finger. Paresthesia, hypesthesia, sciatica, arthritis, gout, hernia, limb deformities, contractures, clubbing, edema, hypotonia, hypertonia, impaired pulses, weakness, paralysis, muscular dystrophy, multiple sclerosis, cerebral palsy, amputation, prosthetic device, limb mobility impairment, inability to perform normal tasks associated with operating a commercial motor vehicle safely, inability to perform pushing and pulling motions with each extremity to the extent needed to operate a commercial motor vehicle safely, inability to perform fine coordination, inability to feel the pedals with both feet, any other limb impairment or limitation which could interfere with operation of a commercial motor vehicle safely. If any of these conditions exist, explain in detail.		
11 Spine, other musculoskeletal	Deformities, limitation of motion, tenderness		
12 Neurological	Dizziness, seizures, coordination, speech pattern, abnormal reflexes, tremors, sensory deficit, muscle strength and tone, paresthesia, muscular dystrophy, multiple sclerosis, cerebral palsy, cerebrovascular accident (stroke), transient ischemic attack, or any other limb impairment or limitation which could interfere with operation of a commercial motor vehicle safely

Amount Financed	$35 986		

The payments calculated above are based on stated terms, or mixed variables (such as credit rating) that you have selected on the page for the vehicle you have selected, and on current programs available through MINI Financial Services. All figures presented are estimates only. Actual selling price may vary. These estimates are not advertisements or solicitations for specific rates or credit terms. They are not an offer of credit financing or of any particular rate or particular transaction. Please see your MINI Dealer for details.

If your estimate is based on a vehicle shown through the MINI Financial Services Payment Estimator the MSRP is a base price with no options added.

If your estimate is based on a vehicle configured in the "Build Your Own" section at MINIUSA.com the MSRP will reflect the options you selected. The amount financed includes any MINI dealer installed accessories. Accessories are not taxed in the residual value of the vehicle at the end of a Lease Owner's Choice or MINI Select financing arrangement.

Monthly payments and taxed requirements may vary based upon credit, state and credit worthiness. Contact your MINI Dealer to determine your actual monthly payment.

Financing disclosures

Annual percentage rates for traditional financing examples that you input and may not be available from MINI Financial Services. Annual percentage rates for MINI Select or Owners Choice are based on an average credit rating assessment. Actual rates and credit terms may vary vary based upon model/ state selected and credit worthiness. Not all customers will qualify for the lowest rates.

Leasing disclosures

For purposes of estimating your monthly payment, the vehicle price you may need payment or trade was used as the net dealer cost of the vehicle. A security deposit is required on lease transactions and in state charges may be imposed at the end of the lease term. Not all lease and leasing options the examples in all areas. Lease rates are based on the creditworthiness of the customer. Not all customers will qualify for the lowest rate.

Statement Information

kWh: Kilowatt-hour. A measure of electrical energy. One kWh is the equivalent of using 1,000 watts for one hour. For example, if you use a 100 watt light bulb for 730 hours (i.e. for 30 days or more), you used 73 kWh.

Customer Charge: A flat amount to cover the administrative costs to maintain your account, such as metering and billing.

Non-Fuel Energy Charge: This number covers the portion of your bill that is not dependent on fuel costs. It includes costs for base rate items, such as investments in power plants, transmission and distribution lines, and other costs of operating our business, as well as costs for conservation programs.

Fuel Charge: A direct pass-through of the fuel costs to produce and deliver your electricity.

Franchise Charge: This cost to supply the electronic amount of energy used on the account within a jurisdiction based on the utility percent. For account customers, this charge also includes the costs of conservation programs.

Electric Service Assessment: Total of the customer charge and non-fuel charges, and delivery charge, if applicable

Taxes (Utility/Florida Sales/Gross/Delivery Sales Tax/Use/Gross Receipts): Taxes, or a set % of excise duty levied by and paid to the State of Florida or local governments.

Storm Charge: A bond recovery charge approved as a financing order by the Florida Public Service Commission to help finance restoration and storm-related expenses. The funds are collected on behalf of a separate legal entity for which FPL has no ownership interest. The storm charge is proposed annually at the mid-second bond repayment costs.

Projected Charge: A fee to help government and we have an agreement with a utility to provide electricity on state lands.

FPL Conservation Funds: Cost amounts collected by FPL and administered by non-profit agencies to benefit those in need.

Prep Time: 25 Minutes
Cook Time: 1 Hour 15 Minutes
Ready In: 1 Hour 45 Minutes
Servings: 12

"Simply delicious. Fresh shredded potatoes and onions make the difference in this breakfast casserole."

INGREDIENTS

- 1 pound sage flavored breakfast sausage
- 3 cups shredded potatoes, drained and pressed
- 1/4 cup butter, melted
- 12 ounces mild Cheddar cheese, shredded
- 1/2 cup onion, shredded
- 1 (16 ounce) container small curd cottage cheese
- 6 jumbo eggs

DIRECTIONS

1. Preheat oven to 375 degrees F (190 degrees C). Lightly grease a 9x13 inch square baking dish.
2. Place sausage in a large, deep skillet. Cook over medium-high heat until evenly brown. Drain, crumble, and set aside.
3. In the prepared baking dish, stir together the shredded potatoes and butter. Line the bottom and sides of the baking dish with the mixture. In a bowl, mix the sausage, Cheddar cheese, onion, cottage cheese, and eggs. Pour over the potato mixture.
4. Bake 1 hour in the preheated oven, or until a toothpick inserted into center of the casserole comes out clean. Let cool for 5 minutes before serving.

TECNO SEATING LIMITED WARRANTY

TECNO Seating chairs are warranted against manufacturing defects in material and workmanship from the ORIGINAL DATE OF PURCHASE as follows.

- 1 year on all non-moving parts
- 1 year on component parts including control mechanisms, pneumatic cylinders, wood plastic parts, base and casters
- 1 year on upholstery materials and foam. Upholstery materials and foam are warranted against unusual wear and/or deterioration.
- Leather is not warranted against routine scratching and scuffing, as leather is subject to minor blemishes being a natural material
- 90 days on electronic components for the massaging units

The warranty obligation is limited to the replacement or repair, at TECNO Seating's option, of defective parts and components. The warranty of this product is null and void if the product is subject to negligence, abuse, misuse, accident, or if the customer does not perform the necessary maintenance outlined below. All warranties are limited to the original purchaser for normal commercial usage defined as a standard forty hour work week by persons weighing 250lbs or less.

This warranty will not cover labor, freight or damage from misuse, abuse, negligence, alteration, accident, vandalism, rusting, acts of nature or any other event beyond the control of TECNO Seating. The warranty does not cover cosmetic damage that may result from normal use. Liability for incidental or consequential damages is excluded. The user assumes all risk of injury resulting from use of this product. When usage exceeds 40 hours per week, a one year warranty on all parts applies. This warranty gives you specific legal rights, and you may also have other rights which vary from state to state. All other warranties, expressed or implied, hereby are disclaimed.

All TECNO Seating chairs are built to meet or exceed ANSI/BIFMA standards.

TO MAKE A WARRANTY CLAIM

Contact our Parts Department via email Tecnoseating@gmail.com, by fax (626) 912-2288, or our toll free number 1 (888) 432-8632 Monday through Friday 8:30 a.m. to 5:00 p.m. Pacific Standard Time. Provide model number and description of the problem and obtain a confirmation number. At its option, TECNO Seating's warranty obligation is limited to the replacement or repair of defective parts and components.

It is the customer's responsibility to prepay freight on any components returned to the factory. Return freight on components covered by warranty will be paid by TECNO Seating.

B. Amplifier Configuration

1. Four Amplifier Mode

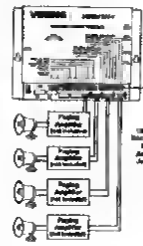
In this mode, each paging zone has its own amplifier and the function of the ZPI-4 is to switch the unamplified paging or background music signal to the appropriate amplifier.

Advantages: There is no amplifier power limitation. Zones can be set to different volumes; background music is selectable per zone and the non-paged zones will continue to get music during a page.

R3

To set the ZPI-4 up in the four amplifier mode:

Step 1.	Attach the ZONE 1 mixer terminals to the input of the amplifier for Zone 1
Step 2.	If background music is to be sourced on the zone 1 mixer, set the ZONE 1 mixer shunts on to place shunting bars also. If not, remove the shunts.
Step 3.	Repeat steps 1 and 2 for each of the remaining mixer inputs.
Step 4.	Install the shunted jumpers across the Opposed Paging Amp mixer terminals
Step 5.	If a background music source is being used, install the optional Background Music Amplifier jumpers as shown.
Step 6.	Set DIP switch 1 to OFF
Step 7.	Connect Paging Amps between zone blocks and speakers.



Paging Amplifier (not included)

Paging Amplifier Jumpers

2. Two Amplifier mode (Paging and Music)

In the two amplifier mode, one amp serves as the paging amplifier and the other as the background music amplifier. The paging or music signal is sent to the external amplifier returned and the amplified music is returned, by the ZPI-4 to the correct zones in zones

Advantages: Up to 8 25V mod amplifier may be used when driving 70V speakers, only 2 amplifiers for one zoned setup are returned for 4 zones background music is selectable per zone, and the non-paged zones will function to get music during a page.

Limitations: The paging amp needs to be limited to 200 watts and the music amp needs to be limited to 70 watts when switching 8 ohm speaker loads, each speaker zone is limited to 8 ohms minimum impedance and the amp must have the ability to drive the speakers in all zones. (Example: 4 zones at 8 ohms per zone equals 2 ohm total load on all rail.)

To set up the ZPI-4 in the two amplifier mode:

Step 1.	Attach the ZONE 1 mixer terminals to the input(s) for Zone 1
Step 2.	If background music is to be sourced on the zone 1 mixer, set the ZONE 1 mixer shunts on to place shunting bars also. If background music is not desired, remove the shunts
Step 3.	Repeat steps 1 and 2 for each of the remaining mixer inputs
Step 4.	Attach the paging amplifier and the music amplifier as shown in the diagram
Step 5.	Set DIP switch 1 to ON

Welcome to

Windows® Fax and Scan

One place to scan and fax your documents

FAX You can send and receive faxed documents on your computer without using a fax machine. You can also print, e-mail, or save a copy of your faxes.

To get started

1. Connect a phone line to your computer.

   If your computer needs an external modem, connect the phone to the modem, and then connect the modem to your computer.

2. On the toolbar, click **New Fax**.

3. Follow the instructions in the wizard to connect a fax modem, and then, when you're finished, create your fax.

To connect to a fax server instead of a modem, contact your system administrator. For more help with faxing, click the **Help** button on the toolbar.

SCAN After you add a scanner to your computer, you can preview documents or pictures before you scan them, and then adjust your scan settings for better results. You can also fax or e-mail scanned files to someone else.

To get started

1. Connect your scanner to your computer by following the instructions that came with your scanner, and then place a document or picture on the scanner.

2. In Windows Fax and Scan, at the bottom of the left pane, click **Scan**.

3. On the toolbar, click **New Scan**.

4. Choose the scan settings you want to use, and then, when you're ready, to scan.

Use the options on the toolbar to fax, e-mail, print, or copy scans. For more help with scanning, click the **Help** button on the toolbar.

A-PRO

The Pest Control Experts

5. The mattress and box spring should be leaned against the wall Bed bugs can hide in small cracks anywhere within the box springs and bed frame so beds should be dismantled to allow access for thorough inspection and treatment

6. Heavy furniture should be moved 18 inches away from walls to allow access for inspection treatment.

7. Dragging/moving mattresses and box springs thorough a hall way could result in bed bugs falling off during the transit and creating a more wide-spread infestation. All items removed from rooms should be completely wrapped in plastic before removal

8. Remove all clothes and shoes from closets

9. Residents will need to remove all animals (birds, cats, turtles, etc)

10. Residents will need to leave the apartment during the treatment and remain out of the apartment for (4) four hours after the treatment has been performed (The service will be between 9.00 A.M to 5.00 P.M)

11. Please make sure that all procedures above are completed before we come to do treatment in your apartment

Thank you for all your cooperation

Windows® Fax og scanning

Et centralt sted, hvor du kan scanne og faxe dine dokumenter

FAX. Du kan sende og modtage faxdokumenter på din computer uden at bruge en faxmaskine. Du kan også udskrive, e-maile eller gemme en kopi af dine faxer

Sådan gør du:

1. Tilslut en telefonlinje til computer

   Hvis computeren skal bruge et eksternt modem, skal du tilslutte telefonlinjen til modemet og derefter tilslutte modemet til computeren

2. Klik på **Ny fax** på værktøjslinjen.

3. Følg vejledningen i installationsguiden for at oprette forbindelse til et faxmodem, og opret derefter faxen.

Hvis du vil oprette forbindelse til en faxserver i stedet for et modem, skal du kontakte systemadministratoren. Klik på **Hjælp** på værktøjslinjen for at få flere oplysninger om at faxe.

SCANNING. Når du bruger en scanner på computeren, kan du se et eksempel på skærmen af dokumenter eller billeder før du scanner dem og derefter justere scanningsindstillingerne for evt. at forbedre resultatet. Du kan også faxe eller e-maile scannede filer til andre personer

Sådan gør du:

1. Tilslut scanneren til computeren ved at følge vejledningen, der fulgte med scanneren, og placer derefter et dokument eller billede på scannerens glasoverflade.

2. Klik på **Scan** i ruden af venstre rude i Windows Fax og scanning.

3. Klik på **Ny scanning** på værktøjslinjen

4. Vælg de scanningsindstillinger du vil bruge, og start derefter scanningen.

Brug indstillingerne på værktøjslinjen til at faxe, e-maile, udskrive eller kopiere scannede dokumenter eller billeder. Klik på **Hjælp** på værktøjslinjen for at få flere oplysninger om at scanne.

The Culture of Japan
Have you ever heard of Tanka?

Tanka is a traditional style of Japanese poetry, which is made up of 31 syllables (5-7-5-7-7) To use this style, poets must condense their feelings of love, yearning, admiration and longing for nature and life into subtle nuances and picturesque words. Because they must condense such strong feelings into such short simple forms, the selection of the appropriate Kanji or Hiragana (syllabify alphabet) has become an art from in itself The more subtle or elegant the words, the stronger and more vivid the readers' imagination.

Because of the nature of this style of poetry, and the close ties to the language and culture , Tanka has developed a simple , elegant, classical style all its own.

People who read Tanka are free to let their imagination soar. The same Tanka may evoke different

FAXING INFO

Mathew Myers has converted all branch fax lines for your Xerox copiers to be connected directly to an outside line All branches are converted over except for Main Library Basically the Xerox has a direct line to the outside instead of going through the phone equipment like before.

If you have fax problems, please DO NOT reboot the phone box in the I T closet It will not fix your problem

If you have issues with your fax machine there are two numbers you can test with to see if it's working.

I T fax 1-614-479-3999. This goes to our I T fax machine Be sure to type in the entire number and not 4 digit dial.

www.faxtoy.net 1-213-294 2943 This goes out to an external test fax website that you can use for free and see if your fax was sent. Be sure to write something on the piece of paper first so you know if your fax made it there Something unique to you Go to www.faxtoy.net to see your fax.

Final note. The curlie has been turned on for all fax machines This means you will be able to hear your Xerox dialing out. This will help with troubleshooting

If you still have an issue after trying both test fax phone numbers, please call the Service Desk to report it to us

BATTERY CHARGING, CLEANING AND MAINTENANCE

General Information

The charger supplied with the electric vehicle solves the most common problems in charging. Undercharging and overcharging are prevented providing that the charger is allowed to shut off by itself. Also, all cells are automatically given an equalization charge at low current, which prolongs battery life. **Batteries should never be left in a discharged state**, as this too, affects the internal components and can reduce the capacity of the battery. The batteries should be charged every day they are used, even if only for thirty minutes or after nine holes. However the batteries should not be charged if they have not been used.

Preventive Maintenance

To keep batteries in good operating condition, follow these steps on a regular basis.

Batteries should be kept clean and dry to prevent self-discharge. Any dirt, grime or acid spillage should be removed. Wash batteries using water and bicarbonate of soda (baking soda— 1 cup per gallon of water). Rinse with water. Do not allow solution to enter battery through the vent cap holes.

Self Discharge

Dirty batteries can provide a path for a small current drain that can slowly discharge batteries, thus wasting valuable energy. To prevent self-discharge, batteries should always be kept clean. Hot weather also has an affect on a battery's self-discharge rate. The higher the temperature, the quicker a set of batteries will discharge. **In hotter climates** batteries should be checked more often.

MAINTAIN PROPER WATER LEVEL.

The water level should be checked weekly to be sure water is at its proper level (see below). Never allow the water level to fall below the tops of the plates because this will cause the exposed part of the plate to become permanently inactive. Check the water level more frequently in hot weather or when batteries become old.

Add water only after charging unless the water is below the level of the plates. If the water level is below the level of the plates add just enough water to cover the plates and then charge the batteries. After charging, fill with water to the level indicator. Filling a battery to the level indicator before charging will result in overfilling because the electrolyte level will rise during charging and some of the electrolyte may bubble out of the cap. This reduces its capacity and corrodes the metal parts around it.

Mr Hansen

Thanks you for [illegible] in your new divisional [illegible] with for the concept phase as agreed earlier

Since your available area is somewhat limited we suggest a modular layout This concept emphasizes space conservation and yet still provides for a modern, pleasing atmosphere

Enclosed are two floor plans The first one will allow you to keep your present furniture The second was designed with the intention that our new space-saving modules be used Notice that the latter will provide for more spacious accommodations and/or room for additional personnel Also included are the specification sheets on these products

After you have had a chance to study our ideas I would like to set up a meeting during October to discuss any further refinements I will have my secretary make the arrangements Please call me in the interim if you have any questions

mainstream of anti-aging medicine and healthy living. They are really it anything an amazing food. Yes, I do use the word food precisely. They do not need to necessarily be consumed daily but like any great and powerful food they should be a part of your regular diet.

In an interview, Dr Grussell called RNA fragments specifically a food. And he is right. The Food and Drug Administration allows for their use in infant formula recognizing their value for normal gi overall health. A gastrointestinal notes: Nucleotides are metabolically important compounds that are the building blocks of RNA DNA and adenosine triphosphate (ATP) and are present in breast milk. It is thought that they may enhance immune function and development of the gastrointestinal act and may be beneficial when added to infant formulas.

I am sharing the world's leading researchers into nucleotides/rations in my work at the University of California, and what also find separating about the Replenish RNA fragments is the overall support for immune health and the dramatic implications this should have for a wide range of patients who are undergoing stressful periods in their lives suffering from immune compromising conditions or exposed to potentially toxic pollutants.

To understand how far-reaching these implications are you need to understand the many roles of white blood cells in the human body. There are many different types of white blood cells. But the RNA fragments have been shown to maintain healthy overall levels in several types of white blood stem cells (recognized by the National Institutes of Health as a totally innocuous study).

In the July 1992 issue of Surgery researchers noted that intake of arginine RNA and omega-3 fatty acids improved the health of gastrointestinal surgery patients. "These results suggest that postoperative enteral nutrition with supplemental arginine RNA and omega-3 fatty acids, instead of a standard enteral diet, signif antly improved immunologic, metabolic and clinical outcomes in patients with upper gastrointestinal malignancies who were undergoing major elective surgery.

Many substances in the environment have a potentially destructive effec on white blood cells the main agents of the immune defenses. As a biochem ist Mirko Beljanski knew that any ce in order to dupl cate needs special trig ger le ments to catalyze cell duplication. He prepared short fragments of RNA primers according to the posts of what the healthy body provides for normal cell multiplication in a selective and specific manner and which do not interfere with other cells. Dr Beljanski developed RealBuild® according to what a healthy body provides naturally to support the body's immune system and to help insure the generation of white blood cells. But they are of critical importance, I believe to anybody interested in immune health.

Mirko Beljanski spent the major portion of his professional life in the labs at the Pasteur Institute France. He published 133 peer-reviewed research papers, many of which are available

Phase I Clinical Trial on the Activity of RealBuild®

The Plant Based Cancer That Phase I, conducted at Cancer Treatment Centers of America (CTCA) is now terminated. The CTCA team is very enthusiastic about the results and a publication is forthcoming. A Phase II Protocol is now being developed.

C-Change

Collaborating to Conquer Cancer

TRAVEL REIMBURSEMENT POLICY

POLICY

As a non-profit organization dedicated to conquering cancer, stewardship of our resources is essential. Our policy is to reimburse individuals for approved, reasonable, proper and necessary travel expenses incurred in conjunction with approved C-Change initiatives. It is C-Change policy that all travel be conducted in the least expensive manner.

RELATED POLICIES AND PROCEDURES

1. LOCAL TRAVEL

   a. **Mileage Reimbursement.** C-Change will reimburse actual and necessary expenses. This includes mileage in a privately owned vehicle (POV), and related tolls and parking. Mileage costs will be reimbursed at the current Government approved rate.

   b. **Parking and tolls.** C-Change will reimburse for parking and tolls associated with a local or long distance trip. Parking and Tolls totaling over $10 per day must have a receipt.

2. LONG DISTANCE TRAVEL

   a. **Air Travel.** C-Change will pay for airfares to approved destinations. Travelers must use the lowest available airfare. Travelers will be reimbursed for special promotional tourism or economy fares as long as these fares do not exceed the lowest available coach fares. Airline tickets in excess of $500.00 must be approved by the Executive Director prior to travel.

   First class, international, and spouse travel is not reimbursable.

   In cases where cancellation fees/penalties are incurred as a result of a change of plans, the fees will be reimbursed if there is a valid business reason for the change of plans. Acceptable business reasons include the organization canceling or altering the trip or delays in flight connections. This explanation should be attached as documentation with the travel expense report. In instances where these fees/penalties are incurred without adequate explanation, the cost of the fees/penalties will not be reimbursed.

LOGFIRE LEDGER

298th Combat Sustainment Support Battalion

Volume 1 Issue 4 June 30 2011

The Last Mile

"Road Dawgs – it a tema," were the final words given to the 104th Transportation Company (TC), from CPT Max Donaldson, the company commander during their RIP/TOA ceremony with the 548th Transport on Company. This ceremony was symbolic of the official release of the 104th TC from their mission in Afghanistan and passed the torch to the 548th TC on June 6 2011. The 104th TC has since headed back to Fort Benning, GA leaving behind some very large shoes to fill. Some of the impressive accomplishments by the 104th include logging well over 800,000 miles on over 1,300 missions and delivering over 3,456 pieces of equipment throughout the Regional Command West and South. During their tour the 104th delivered 200,000 short tons of supplies valued in excess of 200 million dollars, and established the first Transportation Company in RC West. The 104th also played a huge role in the development of the first Standard Operating Procedures used during Combat Logistics Patrols, and providing superior transportat on sustainment support to over 35 units. These units included the Central Intelligence Agency, Italian Army, Dutch Army, Slovenian Army, U.S. Air Force, Marines, Special Forces, five Brigade Combat Teams, four Combat Sustainment Support Battalions and Afghan National Army Soldiers.

As CPT Donaldson looked over his troops after the ceremony, he said "The most rewarding experiences of this deployment were the humanitarian missions they showed the soldiers, as well as the people of Afghanistan, why we were here." He went on to say "What I m looking forward to the most is reuniting soldiers with their families." CPT Douglas Adams, the company commander of the 548th Transportation Company expressed how his soldiers were eager to start performing their missions, and apply the new tactics and procedures they have learned from the 104th TC. "We are warriors and aren't afraid of work," he stated. CPT Adams and the soldiers of the Missouri National Guard 548th TC, intend to set the bar high for the next company.

So as the 104th are bide farewell the 548th is being welcomed to the 298th CSSB Log Fire team. The 104th will be sorely missed. It is with great anticipation that the 548th take the reins and lead the way in providing transportation and support for movement of ammunition and other cargo in the western part of Afghanistan.

Windows® Fax and Scan

Connect, send, and receive faxes

You can send and receive faxes using your computer, a fax modem, and an Internet fax service. You can also scan documents and pictures and send them to others as e-mail attachments.

Set up a fax account

Before you can send or receive faxes, you must set up a fax account for each fax modem installed on your computer or for each Internet fax service you want to use.

1. Open Windows Fax and Scan.
2. On the toolbar, click **New Fax**.
3. If this is the first time you've opened Windows Fax and Scan, a wizard will start to help you set up a fax account. Follow the instructions in the wizard to set up your fax account.

Send a fax

1. Open Windows Fax and Scan.
2. On the toolbar, click **New Fax**.
3. Enter the recipient's fax number or select a recipient from your contacts list.
4. Add a cover page, if you want.
5. Click **Send**.

Receive a fax

Before you can receive faxes, you must configure Windows Fax and Scan to receive faxes using a fax modem or Internet fax service that you've set up.

1. Open Windows Fax and Scan.
2. On the toolbar, click **New Fax**.
3. Choose how often you want to check for incoming faxes.

Scan a document or picture

1. Open Windows Fax and Scan.
2. On the toolbar, click **New Scan**.
3. Choose the scanner you want to use and the type of scan you want to perform.

Troubleshooting Steps

Steps below help to resolve common faxing problems.

-Switch off fax machine and unplug power supply from the wall outlet. Let fax machine remain off for 60 seconds.

-Try a different phone cord between the fax machine and the Vonage device. Preferably 25' phone cord

-Eliminate any splitters.

-Connect fax machine directly to the Vonage device. Bypass ring any home wiring

-If using and All-In One device, temporarily disconnect device from PC

Ok, sometimes you might need to send a fax document to some legal, financial, medical or government agency and you don't want to pay 1, 2 or 3 dollars a page of your local software copy center. You probably don't want to sign up for those free e-mail fax providers over 30K internet fellow software copy? likely place advertising on your fax or have all your fax number and annoy you later for a subscription service. You can avoid all the with this complete, free fax machine, or other fax software or a fax that might be built into your All-in-One Printer. If you have fax software or a fax machine that you haven't used for a while you might want to test it too with a new fax number. Here is a list of free fax software that are setup specifically for testing your fax software or fax software within the USA or Canada.

These test fax software will work on any fax machine, All-in-One Printer with fax, or any type of fax machine using a fax number such as FaxToSo. These numbers are subject to interrupt without notice.

Testing fax sending only

A web site or fax by dot net fax machine that will allow you to send a fax test. Send a fax test free + 1-805-335-1200 or + 1-213-204-0801 (Los Angeles, CA USA)

NOTE: Faxes sent to this number are being displayed for all to see on the Web site fax by dot net — do not fax any private, sensitive, confidential or personal material.

If you're using a software fax machine, make sure your dialing the number correctly. Incorrect dialing settings may automatically receive free faxes or advertising software/machine, online or your machine.

Verifying your fax was machine successfully

Visit the Web site fax by dot net and view the thumbnail for. Find the thumbnail to view a fax page of the fax. If you do not see your fax, see the Remote refresh button to interrupt/repeat. Your fax thumbnail should appear within a few minutes after a successful send from your fax software or fax software

Testing send and receive software to your fax

receive software(s) provides a free fax testing receive fax free test fast sending and receiving features of your fax machine or fax machine.

Send a fax to +1-866-479-2989 (Toll Free in the USA and Canada)

Receiving a fax — To ensure you can receive a fax, make you successfully send a fax to the service it will automatically dial you back within a few receive (using your caller ID information and/or CSID) the attempt to send you a fax.

If you using any call blocking as fax caller ID information is not good, you will not receive a return fax. You should also ensure your CSID (Caller and/or Sender's is properly configured to receive your fax receive for the return call and you have auto-receive option turned on your fax software or fax software

Setting your CSID with FaxTalk:
Click on Tools, Options, Fax, Advanced to configure the CSID.

PAW PRINTS 4H DOG CLUB

VACCINATIONS FOR DOGS IN 4H

These vaccinations are required for exhibition of dogs in the 4H program in Indiana.

Rabies – either 1 or 3 year vaccination
DHPP- either 1 or 3 year vaccination
(distemper, hepatitis, parainfluenza, parvovirus)
Leptospirosis – 1 year vaccination
Bordetella (kennel cough) 1 year vaccination

A completed Certificate of Vaccination form #671 must be signed by a licensed Veterinarian and turned in to the 4H dog leader to be able to bring your dog to training sessions and show at 4H show. This is part of the completion of the dog project.

Vaccinations must remain current. Any dog whose vaccinations expire must be revaccinated and have an updated form turned into 4H leader

4H DOG PROJECT WORKBOOK

4H dog workbooks are available at 4H extension office. Work books go by school grades 3-5 6-8 9-12. Must complete one activity in each chapter and fill out workbook sheet. (Dog club will be picking out exercises to work on during dog club meetings) Must be turned into 4H dog leader by the completion date

4H DOG RECORD SHEET

Available from 4H dog leader. Bi fold 4H form #390W where the 4Her keeps a diary of expenses and time spent on the dog project. This is an on going diary to be turned into the 4H dog leader by the completion date.

The turning in of these papers to the official 4H dog leader by the established date in the completion of the 4H dog project. The showing of the dog at the county fair is encouraged but not necessary to complete the educational experience. The showing of the dog is a privilege and is voluntary on the part of the eligible 4H member

TOP TRAINER AWARD

An award given within the Paw Prints 4H Dog Club to the 4Her whose earns the most points within the 4H dog club. Example of points attendance at meetings, turning in paperwork early, being an officer of the club, volunteering, ect. Those are added at the score from the 4H dog show. Top winner in Junior, Intermediate, and Senior will be given.

EQUIPMENT NEEDED

6 foot leather or nylon leash, training collar flat buckle collar (will discuss how to measure the dog neck for size and how to order at first couple meetings) Showmanship leash will be needed in May (will have for sale then)
Rate if 4Her has old backpack or bag with their name on it for all dog equipment and treats.
Also the 4Her must wear the appropriate footwear to all the training sessions (no sandals, flip/flop ect)

PARENT VOLUNTEERS

There are many ways for you to help and make this a great experience for your child. Volunteer at the training sessions, set up equipment, help in 4H dog clinic or mock show or even help with photographing the club activities. See a 4H dog leader to sign up.

How Can I Test My Fax Machine?

I just hooked up a new fax machine and I'd like to test it, just to make sure it works. How can I do that?

Presumably you want to test your fax machine by sending a fax from it and receiving a fax with it. Here's how to do both.

To test the send functionality of your fax machine, send a one-page fax to 1-858-430-1039 (a toll-free number in the United States.) When it is finished transmitting, point your web browser to fax.com and a fun web site that displays whatever is faxed to that number. Within a minute, your fax should appear on the site. Click the thumbnail to see a large version.

To test the receive functionality of your fax machine, point your web browser to fax4free, this site lets you send faxes for free to anywhere in the United States and Canada. Within a few minutes, your fax machine should ring — hopefully, it will automatically answer and spit out the test fax.

Behavior Policy

In order to attend the Class of 2015 College Trip, I understand I must adhere to the following guidelines

I will follow **standard** rules of behavior throughout the College Trip. I am aware that everything I do reflects on SEO and I need to ensure that SEO is able to maintain a positive relationship with the colleges/universities we will be visiting.

I **must** follow the directions of all staff members on the college trip. The staff members who will be on the trip are as follows: Melanie Valverde, Colin Shay and Kira Slocum as well as additional staff members

General Rules

- Arrive ON TIME in the morning. The colleges/universities are expecting us on campus at specific times and we must make sure to keep on schedule. In the event that your child is late, we will leave without him/her
- Dress in business casual clothing (no jeans, no sneakers)

Bus Rules

- There is no screaming/shouting;
  Keep MP3 and other audio players at a minimal volume so they do not disturb others,
  Leave your area, seat, and bus, clean,
- Pick up any trash around your area
  Return to the bus ON TIME: We are on a VERY tight schedule and cannot wait for anyone who is late.

On the College Campuses

We are representing SEO so it is important to stay alert, be engaged and be respectful towards the tour guides and information given

There is absolutely no phones or headphones used at any time during any tour or info session.
Stay with your tour group: do not leave without telling a chaperone/intern/tour guide;
Take notes during tours and info sessions. You will have an opportunity to ask questions
REMAIN ENGAGED AND ALERT. DO NOT FALL ASLEEP!

I adhere to the above guidelines and understand that there may be consequences if I do not follow them, up to and including dismissal from SEO Scholars

complainant physically threatened J and falsely told him that she had caught the offence on videotape J admitted taking the machine The complainant then drove J to the police station The officer arrested him for breach of probation with respect to another offence The next morning J was told by the police officer that there was pertinent evidence showing that he was guilty of theft. J first refused to speak to the police officer about the theft. The officer reviewed the young offender waiver of the right to counsel with J From the wording of the form it appeared that J possibly did not understand the consequences of speaking without counsel J provided a statement, in the middle of which he asked if he could see the videotape of him He was then charged with theft. The trial judge found that the waiver of the right to counsel was sufficiently explained and that J's statement was voluntary

HELD Appeal allowed The conviction was set aside and a new trial ordered The voluntariness of J's statement to the police was questionable given his possible lack of understanding of his right to counsel and the fact that he had not yet been charged with theft. Further the trial judge erred in failing to address the issue of whether the admission J made to the complainant at the roadside confrontation was given under duress The police officer's reference to pertinent evidence was the backdrop against which J made a statement and in J's mind it referred back to the non-existent videotaped evidence mentioned by the complainant.

[Editor's note A Corrigendum was released by the Court October 1 1999 the correction has been made in the text and the Corrigendum is appended to this document]

The judgment of the Court was delivered by

1 GOLDIE J A – This is an appeal by a young offender ('A J ') from his conviction on the single count of breaking and entering a dwelling place and committing therein the indictable offence of theft The issue is whether the evidence upon which he was convicted was so tainted that it should have been excluded

2 The offence was alleged to have been committed on or about 8 June 1998 and the dwelling house in question was owned or occupied by the complainant.

Prayer to St Joseph over 1900 years old

O St. Joseph whose protection is so great, so strong, so prompt before the Throne of God, I place in you all my interests and desires O St. Joseph do assist me by your powerful intercession and obtain for me from your Divine Son all spiritual blessings through Jesus Christ, Our Lord: so that having engaged here below your Heavenly power I may offer my Thanksgiving and Homage to the most Loving of Fathers. O St Joseph, I never weary contemplating you and Jesus asleep in your arms. I dare not approach while He reposes near your heart. Press him in my name and kiss His fine Head for me, and ask Him to return the Kiss when I draw my dying breath St. Joseph Patron of departing souls, pray for us. Amen

Say for nine consecutive mornings for anything you may desire. It has seldom been known

to fail.

This prayer was found in the fiftieth year of Our Lord Jesus Christ In 1500's it was sent by the Pope to Emperor Charles when he was going into battle

Whoever reads this prayer or hears it or carries it, will never die a sudden death, nor be drowned, nor will poison take effect on them. They will not fall into the hands of the enemy nor be burned in any fire, nor will they be defeated in battle.

Make this prayer known everywhere

Imprimatur

Q: Why are hawks such great football fans?
A: They're always watching the game on the field.

Q: What has many eyes but cannot see?
A: A potato.

Q: Why are basketball players such sloppy eaters?
A: Because they always dribble.

Q: How do you know when you've built your own?
A: When your feet smell and your nose runs!

Q: Why does Santa have so many reindeer?
A: So he can have venison!

Q: Why did the mouse dance on the peanut butter jar?
A: Because it was trying to open.

Q: What did the metal say to the refrigerator?
A: Close the door, I'm freezing!

Q: What did one eye say to the other?
A: There is something between us that smells!

Q: What did the tomato eat for breakfast?
A: Oatmeal!

Q: What do you get when you cross a bell and a skunk?
A: An alarm clock.

Q: What do you get when you cross cassava and a rose?
A: A cassa-flower.

Q: When part of a hen has the most feathers?
A: The tail!

Q: Why weren't apples afraid on Noah's ark?
A: Only pears were aboard!

Q: Why did the little skunk listen to the big skunk?
A: Because it was older and wiser.

Q: What kind of bird can lift heavy things?
A: A crane!

Q: What does a 2,000-pound mouse say?
A: Here, kitty kitty!

Dear Pete,

Permit me to introduce you to the facility of facsimile transmission.

In facsimile a photocell is caused to perform a raster scan over the subject copy. The variations of print density on the document cause the photocell to generate an analogous electrical video signal. This signal is used to modulate a carrier, which is transmitted to a remote destination over a radio or cable communications link.

At the remote terminal, demodulation reconstructs the video signal, which is used to modulate the density of print produced by a printing device. This device is scanning in a raster scan synchronised with that at the transmitting terminal. As a result, a facsimile copy of the subject document is produced.

Probably you have uses for this facility in your organisation.

Yours sincerely,

Phil.

Message :

Presumably, you want to test your fax machine by sending a fax from it and receiving a fax with it. Here's how to do both.

To test the send functionality of your fax machine: send a one-page fax to 1-855-330-1239 (a toll-free number in the United States.) When it's finished transmitting, point your web browser to Fax Toy — it's a fun web site that displays whatever is faxed to that number. Within a minute, your fax should appear on the site. Click the thumbnail to see a large version.

To test the receive functionality of your fax machine: point your web browser to FaxZero; this site lets you send faxes for free to anywhere in the United States and Canada. Within a few minutes, your fax machine should ring — hopefully, it will automatically answer and spit out the test fax.

Customer Quick Fixes

TV has no picture or remote is not responding:

- Make sure that the TV is on the right input for the cable box to display a picture (i.e. Channel 3 or 4, video 1, component, HDMI etc.) **YOUR DEFAULT CHANNEL IS** [ ]
- If your VCR is on, try turning it off. This can disrupt the feed from the box to the TV.
- Verify that there is nothing obstructing the path of the remote to the cable box.
- Make sure that there are fresh batteries in the remote and that they are inserted correctly
- Make sure you press the "cable" button on the remote if trying to change channels
- If none of the above work, you may need to reprogram your remote. Go to **www.xfinity.com** and enter "Program my remote" in the search window

If you are unable to access the Internet:

- Verify all lights on the modem including the "online" and "power" lights are on.
  If not, press the Standby button on the front or top of your modem
  Press the Standby button again to restore power
- If a "*Welcome To Comcast*" page is showing, walk the Login the "I Am a Customer" setup option.
- If you have recently connected a device (gaming console, laptop, etc.) power cycle the modem each time by unplugging the modem's power cord and then plugging it back in
- If you are using a router (personal or from Comcast), unplug the power cord to both the modem and the router and turn off the computer. Plug in the modem. After 30 seconds, plug in the router and then turn on the computer. (This is the correct series of powering up all devices to make them work together correctly.)

  Another Option: Disconnect your router and plug in your computer directly to the modem. If that works, your router may be the issue. (**Note**: *Consult the router's owner's manual as Comcast does not support non Comcast equipment.*)
- Try temporarily disabling any spy ware/firewall or anti virus programs that are running. Then, reset the modem. (Sometimes, these programs may block you from connecting to the Internet.)
  Make sure you re-enable the programs afterwards!
- If using a work issued laptop, contact your IT administrator to update / verify settings

Your phone has no dial-tone when you pick it up:

- Verify the lights on the phone EMTA are on. (When the phone is on hook, the "tel 1" light should be solid. When you pick up the phone, "**tel 1**" light should be blinking.) If no lights are present, confirm that the modem is plugged in. (Try using a pen/pencil to push the "reset" button on the back of the modem to reset the line.)
- Make sure the phone cord on the back of the phone EMTA is plugged into the "**tel 1/2**" port and not the "**tel 2**" port. (The "**tel 2**" port is for a 2nd phone number only.)
- Try plugging your phone directly into the "**tel 1/2**" port on the back of the phone modem

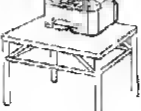
1 Mettez la machine hors tension puis débranchez le cordon d'alimentation électrique de la prise. Déplacez la machine à un emplacement dans lequel la partie arrière dépasse d'au moins 40 cm du bord de la table.

⚠ Ne faites pas fonctionner la machine sur la table. Cela peut la faire tomber lors de l'utilisation, pour laquelle elle est normalement prévue. Risque de blessures et de dommages matériels.

2 Débranchez le câble de mise à la terre fonctionnelle si celui-ci est déjà connecté à l'arrière de la prise.

1



2

3 Placez et serrez la protection plastique de la fiche de type Y qui est située au bout du câble de mise à la terre fonctionnelle.

⚠ Ne retirez pas ou ne percez pas cette protection car elle est nécessaire pour la fixation correcte de la fiche.

2. Vérifiez la position de la vis de la fiche avant d'utiliser la mise à la terre fonctionnelle. La position de fixation du câble de mise à la terre fonctionnelle varie selon le produit. Reportez-vous aux illustrations 1, 2 ou 3 pour plus d'informations. Il est très important de bien serrer la vis.

⚠ Ne serrez pas complètement la vis avant de vous être assuré que la fiche est correctement positionnée. Vous risquez de ne pas pouvoir retirer la vis.

5 Insérez la fiche avec la vis dans l'encoche de la prise à laquelle la mise à la terre est reliée. Une fois qu'elle a été insérée, faites-la pivoter de 90° afin de ne pas pouvoir retirer la fiche.

6 Rebranchez le cordon d'alimentation électrique et remettez la machine à la position voulue.

1 Rebranchez le cordon d'alimentation électrique à la prise. Débranchez le câble de mise à la terre de la prise arrière de la machine. Insérez la fiche avec la vis dans l'encoche de la prise arrière de la machine. Serrez la vis à l'aide d'un tournevis cruciforme.

2 Retirez le câble de mise à la terre fonctionnelle de la pochette. Puis connectez-le à l'arrière de la prise. Il n'est pas nécessaire de brancher la fiche arrière à cette prise de terre car elle est déjà connectée à la terre via le cordon d'alimentation électrique.

3 Placez et serrez la protection plastique de la fiche de type Y qui est située au bout du câble de mise à la terre fonctionnelle.

⚠ Ne retirez pas ou ne percez pas cette protection car elle est nécessaire pour la fixation correcte de la fiche.

4. Desserrez la vis à la prise. Mettez en contact la fiche avec la vis et la prise puis serrez la vis à l'aide d'un tournevis cruciforme. Assurez-vous que la fiche est correctement fixée.

5 Rebranchez le cordon d'alimentation électrique et remettez la machine à la position voulue.

Presumably, you want to test your fax machine by sending a fax from it and receiving a fax with it. Here's how to do both.

To test the send functionality of your fax machine, send a one-page fax to 1-888-877-1655 (a toll free number in the United States.) When it's finished transmitting, point your web browser to Fax Fax — it's a fun web site that displays whatever is faxed to that number. Within a minute your fax should appear on the site. Click the thumbnail to see a large version.

To test the receive functionality of your fax machine, point your web browser to FaxZero. this site lets you send faxes for free to anywhere in the United States and Canada. Within a few minutes, your fax machine should ring — hopefully, it will automatically answer and spit out the test fax.

Software and workloads used in performance tests may have been optimized for performance only on Intel microprocessors. Performance tests, such as SYSmark and MobileMark, are measured using specific computer systems, components, software, operations and functions. Any change to any of those factors may cause the results to vary. You should consult other information and performance tests to assist you in fully evaluating your contemplated purchases, including the performance of that product when combined with other products.

Alvermann makes a valid point that self questioning takes the form of being tied to not just reading and writing alone, but also with the hands on aspect of talking / doing, i.e a constructivist approach. Alvermann stresses this approach works best by utilizing multiliteracies, much as gardner's multiple intelligences in this, all forms of literacy are utilized – cd-roms, videos, Internet, print, hyper texts / media, tied to active inquiry as the student carries active inquiry—the goal of encouraging students to pose their own questions of their observations of the everyday world

The self-questioning is only strategy to be used in conjunction with other approaches. In teacher dominated / or textbook dominated questioning, there is a cookie cutter focus on per-conceived notions that do not allow the freedom for the student to be creative in coming up with that big idea. In self-questioning, there is an open dialogue that is fueled by hands on doing in utilizing scientific equipment to explore. As Alvermann points out in Chin's study, self-questioning can wrap itself up in basic information questions that are important in procedure tasks and the more important wonderment questions, which actually are students defending and engaging with a new idea as hypothesis verification and questioning tied to evidence to engage the argument of how to get a desired outcome or why the outcome was not achieved and what this implies overall from the observable evidence in the lab experiment.

Important too Alvermann stresses that scaffolded instruction must be in place with a constructivist approach to learning in order to fully guide students self-questioning. Above all though, self-questioning in the shell of wonderment questions are bringing forth the new ideas and engagement to generate new scientific inquiry in the problem being examined by the student and is vital to being scientific literate according to Alvermann.

Meta cognitions role goes hand in hand with self-questioning in upholding the big idea and promotion of finding one's angle on an argument from the evidence.

Note

Problem	Solution
Offset Image The most common offset is when toner ripples to be smeared on the page and placed about 95 mm (3.75 in.) across the page in the direction the paper moves through the printer. Note: For a different distance, see the Repeating Defects Page to identify the source. 	Verify that the paper you are using is the correct type for the printer and is properly loaded. • For information on supported paper types and weights, at the control panel, press **Machine Status**, touch **Information Pages**, > **Paper Tips Page** > **Print**. • Verify that the paper type is selected on the control panel and in the print driver. If the problem continues: 1. Do one of the following: • Trays 1–4 and 6: Open and close the selected paper tray. • Tray 5: Remove and reinstall all of the paper. The control panel prompts you to confirm or change the paper type. Note: To change the size, type, and color of paper in a dedicated tray when the control panel is locked, log in as the system administrator. 2. At the touch screen, confirm Type, and then do one of the following: • Select the correct paper type, then touch **Confirm**. • Select the next lighter type of paper, then touch **Confirm**. Note: Paper types from lightest to heaviest are: • For uncoated paper: Plain, Lightweight Cardstock, Cardstock, and Heavyweight Cardstock • For coated paper: Light Glossy Cardstock, Glossy Cardstock, and Heavy Glossy Cardstock 3. Intensify the issue using the Repeating Defects Page. See the previous page for details.

[9] Emergencies: Emergencies such as serious injuries, serious illness or death to the signing parties to this agreement or their immediate families will cause this agreement to be null and void. Photographer will return any retainers made and will not charge for time or material expenses incurred while preparing for the shoot. Client(s) as well as Photographer must produce documentation in writing showing cause stating reason, relationship and have an excuse signed by an attending physician, charge nurse or funeral director. For the purpose of this agreement immediate family will consist of parents, stepparents, brothers, sisters, spouses, children, stepchildren, grandchildren and grandparents, as well as myself and the bride or groom. Either party may invoke this clause up to five days prior to the wedding causing this agreement to become null and void.

[10] Upon signature, photographer reserves the time and date agreed upon and will not make other reservations for that time and date. For this reason all payments are not refundable-even if the wedding is cancelled with an exception for (9) above. No other photographer will be permitted to photograph, pose, direct or interrupt while Photographer is working. Any breech of this agreement will constitute a reason for non-completion of the job with no liability to the photographer and the loss of all payments made under this contract. Checks shall be made payable to Ben Brendle Photography LLC and mailed to Our Address.

[11] Client has the right to a three (3) day grace period to void this contract. Photographer must be notified in writing. The postmark shall not be older than three (3) days of the date following the signature of the contracting party. Photographer is not responsible for lost or undelivered mail.

[12] Photographer reserves the right to edit and will be the final authority on the images that will be offered for sale to the client.

[13] The care and feeding of your photographers. They will be spending the day with you- please discuss vendor meals with your caterer. Meals are best provided at time bride & groom are eating. (You don t want to be photographed eating and this is a good time for the photographers to take a break) As an alternative let Ben Brendle Photography, LLC staff know one week in advance so that their chef can provide their meals.

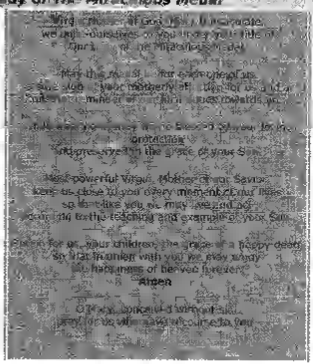
...ver ... Our Lady of The Miraculous Medal



Prayer to St. Joseph, as Patron of Workers
Blessed St Joseph, patron of all working people obtain for me the grace to labor in a spirit of penance for the atonement of my many sins Help me to be conscientious in my work so that I may give as full a measure as I have received

May I labor in a spirit of thankfulness and joy, ever mindful of all the gifts I have received from God that enable me to perform these tasks. Permit me to work in peace, patience, and moderation keeping in mind the account I must one day give of time lost, talents unused, good omitted, and vanity of success, so fatal to the work of God. Glorious St. Joseph, may my labors be all for Jesus, all through Mary and all after your holy example in life and in death Amen.

Hail Mary

Today begins the 90th Anniversary of the apparition of the Virgin of Fatima

When you receive this email say a Hail Mary and ask for a special favor

"Hail Mary, full of grace. The Lord is with thee Blessed art thou among women and blessed is the fruit of thy womb, Jesus. Holy Mary, Mother of God, pray for us sinners, now and at the hour of our death, Amen." (your request)

Please do not break the Novena , send it to 12 people you think deserve justice, peace, love, health, prosperity and truth When you are down to nothing, God is up to something This has been traveling since 5/13/07!

The EGFR Mutation assay is a quantitative Real-Time PCR based mutant enrichment assay with selective blocking of EGFR wild-type amplification. The amplification products are purified and subject to sequencing to confirm the presence of the EGFR mutation. This assay analyzes for the following EGFR mutations: del 19, L858R and T790M. The assay has a specificity >99% and sensitivity >98% at 0.10% mutant allele frequency

Hail Mary:

Today begins the 90th Anniversary of the apparition of the Virgin of Fatima :

When you receive this email say a Hail Mary and ask for a special favor.

"Hail Mary, full of grace. The Lord is with thee. Blessed art thou among women and blessed is the fruit of thy womb, Jesus. Holy Mary, Mother of God, pray for us sinners, now and at the hour of our death, Amen.? (your request)

Please do not break the Novena , send it to 12 people you think deserve justice, peace, love, health, prosperity and truth. When you are down to nothing, God is up to something. This has been traveling since 5/13/07!

ICSA Labs, an independent division of Verizon Business, offers vendor-neutral testing and certification of security products. Hundreds of the world's top security vendors submit their products for testing and certification at ICSA Labs. The end users of security and non-security technologies rely on ICSA Labs to authoritatively set and apply objective testing and certification criteria for measuring product compliance and reliability.

Pitney Bowes' Ethernet-enabled IntelliLink Control Center (ICC) running Mega software successfully satisfied all certification criteria, and has achieved ICSA Labs Premier Services Certification. ICSA Labs verified that the ICC operated securely over an Ethernet connection, was not vulnerable to exploitation itself, and did not introduce any new security vulnerabilities on the test network. ICSA Labs was also able to validate that the ICC correctly and successfully expedited postage refills and software updates while providing plug and play functionality.

More About ICSA

ICSA Labs Premier Services offers customized evaluation and certification testing services for information technology products and solutions. For each product submitted for certification testing, ICSA Labs creates a test methodology and certification criteria tailored to the unique qualities of each product or technology. The customized criteria are based on existing criteria from ICSA Labs certification programs as well as input from the vendor of the candidate product, industry experts, and our Premier Services Alliance Partners. ICSA Labs tests the candidate product against the criteria using a defined test plan to determine whether the product satisfies the criteria. If all of the test criteria are met, ICSA Labs will issue certification to the product or technology. To view Certification testing reports for ICSA Labs certified Premier Services products, visit **http://www.icsalabs.com** and click on the "Premier Services" link.

How Can I Test My Fax Machine?

I just hooked up a new fax machine, and I'd like to test it, just to make sure it works. How can I do that?

Presumably you want to test your fax machine by sending a fax from it and receiving a fax with it. Here's how to do both:

To test the send functionality of your fax machine, send a one-page fax to 1 855-330 1239 (a toll-free number in the United States.) When it's finished transmitting, point your web browser to Fax Toy — it's a fun web site that displays whatever is faxed to that number. Within a minute, your fax should appear on the site. Remove tape and packing materials.

Note Some of the pictures in this poster might not match your printer.

2

Install the input tray and the output tray.

3

Connect the power cord and the adapter.

4

Lift up the control panel and turn on the printer.

5

Follow the instructions on the printer control panel to finish setting up the printer, including:

- Setting the language and location
- Loading paper
- Installing the ink cartridges
- Installing the printer software

While the printer initializes, you might hear some sounds.

Note Ink from the cartridges is used in the printing process in a number of different ways, including in the initialization process, which prepares the printer and cartridges for printing, and in printhead servicing, which keeps print nozzles clear and ink flowing smoothly. In addition, some residual ink is left in the cartridge after it is used. For more information see

6

Register the printer

By taking just a few quick minutes to register, you can enjoy quicker service, more efficient support, and printer support alerts if you did not register your printer while installing the software, you can register later at

Irish Joke No. 487

Paddy and his missus are lying in bed listening to the next door neighbor's dog barking.

It had been barking for hours and hours.

Suddenly, paddy jumps out of bed and says, "I've had enough of this." He goes downstairs.

Paddy finally comes back up to bed and his wife says, "The dog is still barking. What have you been doing"

Paddy says, "I've put their dog in our yard ... now we'll see how THEY like it!"

CHANGE A LIFE

Dear Valued Member,

This year we set a goal of losing 10,000 pounds in three months! It was an exhilarating time as our members and their personal trainers worked incredibly hard. Fitness 19 is excited to announce that the participants in our Get Fit & Win Challenge lost 13,548 pounds in April, May, June & July!! And 40 of our members will be showing off their hard work with an all expense paid vacation to Maui!!

Now we want to celebrate by changing more lives!! **September is Change A Life Month.** We have waived the $99 add-on fee and enclosed a certificate for NO ENROLLMENT and ONLY $12 PER MONTH for you to give to a family member, friend, or neighbor. When your guest enrolls Fitness 19 will lower your dues by $1. Let's work together to change the life of someone you know and care about.

To help change lives this month Fitness 19 has enclosed a Buy 2, Get 2 certificate for personal training. Buy 2 sessions at regular price and Get 2 sessions completely free!

In good health,
Fitness 19

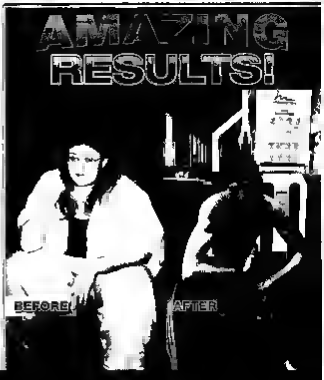
Hurry! Offer Expires Sept. 30th



F Non-Spousal Beneficiary Continuation/5-Year Deferral

As a non-spouse beneficiary under the contract(s) you may defer receipt of the death proceeds in the annuity contract up to the 5th anniversary of the date of the decedent's death.

Note: If electing Option F, you cannot elect Option B to receive annuity income payments or Option E to transfer proceeds to an Inherited Non-Qualified Annuity Contract after the first anniversary of the decedent's date of death for after December 31st of the year following the year of the decedent's death for Option E to transfer to a Decedent IRA)

"If the decedent's contract is a MetLife Preference Premier, Preference Plus Select, Preference Guarantee Select or Preference Flex Select, which contains a Non-Spousal Beneficiary Continuation death benefit provision, and you elect Option F the information in section F1 is applicable to your claim. For any other fixed annuity or Variable annuity, please refer to section F2 below.

F1 Non-Spousal Beneficiary Continuation (Only available on certain contracts referenced above and if product minimums are met—not available to non-natural beneficiaries). On the 5th anniversary of the decedent's date of death, the death proceeds will be paid to you in a lump sum and tax withholding will be based on your election in Section H. You will have the right to designate beneficiaries and request partial and full withdrawals of your share of the death proceeds, but no additional purchase payments can be made. The death proceeds will be subject to investment risk.

If section F1 applies to your claim, please continue to & complete Section H—Income Tax Withholding Election, Section I—Designation of New Beneficiaries and Section J—Disclosures, Certifications and Signatures.

F2 5-Year Deferral: On or before the 5th anniversary of the date of the decedent's death, you will be required to submit a new beneficiary claim form with your final payment instructions and you will receive the entire death benefit payment in a single sum. If the contract is a variable annuity, the entire account balance will remain in the investment allocations in effect on the date of death, and the account balance will be subject to investment risk, until the death benefit payment is made (this may or may not impact your death benefit amount). You will not be able to request transfers, partial withdrawals or exercise any other contractual rights. You will not be able to designate beneficiaries and if you die prior to the 5th anniversary of the date of the decedent's death, the proceeds of the annuity contract will be payable to your estate.

If section F2 applies to your claim, please continue to & complete Section J—Disclosures, Certifications and Signatures.

G Full Claim Payment

Election To Receive the Taxable Annuity Claim Payment Now

We will pay you the annuity death claim payment in a single sum, and report the taxable portion of the claim payment as taxable income (on Form 1099-R) for the calendar year of payment.

The Claim Payment check is to be paid (Choose one of the following)

☐ **Paid to me, the beneficiary, by check at the mailing address indicated in Section B on page 1 of this form.**

☐ By establishing a **Total Control Account®** (TCA) in my name. I confirm that I have read the material titled "Total Control Account Features" provided at the end of this claim form. (The option to establish a TCA is available only if the amount payable to you is $5,000 or more.)

Under either method of claim payment, we will report the portion that is includible as taxable income for Federal Income Taxes, for the calendar year in which it is processed. If you elect this option, **please complete the withholding election in Section H below.**

☐ **Electronic Funds Transfer**
(PLEASE ATTACH A VOIDED CHECK.)
It is the Contract Owner's responsibility to inform the Company of any changes to banking information.)

Bank Name

Bank Mailing Address

City State Zip Code

ABA Routing Number Account Number

Type of Account: ☐ Checking ☐ Savings

Note: A signature guarantee is required if the distribution will be sent to a location other than the address indicated in Section B.

If selecting this option, continue to & complete Section H—Income Tax Withholding Election and Section J—Disclosures, Certifications and Signatures.

Thanks you for considering [illegible] for the [illegible] landscaping in your new divisional headquarters We are pleased to submit our proposal herewith for the concept phase as agreed earlier

Since your available area is somewhat limited we suggest a modular layout This concept emphasizes space conservation and yet still provides for a modern pleasing atmosphere.

Enclosed are two floor plans The first one will allow you to keep your present furniture The second was designed with the intention that our new space-saving modules be used. Notice that the latter will provide for more spacious accommodations and/or room for additional personnel Also included are the specification sheets on these products

After you have had a chance to study our ideas, I would like to set up a meeting during October to discuss any further refinements. I will have my secretary make the arrangements Please call me in the interim if you have any questions

Conan O'Brien's Speech to the Harvard Class of 2000

I'd like to begin by thanking the class marshals for inviting me here today. The last time I was invited to Harvard it cost me $110,000. So I was reluctant to show up. I'm going to start before I really begin by announcing my one goal this afternoon. I want to be half as funny as tomorrow's Commencement speaker, moral philosopher and economist Amartya Sen. That's the job. Must get more laughs than seminal wage-price theoretician. By the way, enjoy that. Bring a calculator. It's going to be a nerd fest.

Students of the Harvard class of 2000, 15 years ago I sat where you sit now. And I thought exactly what you are now thinking. What's going to happen to me? Will I find my place in the world? Am I really graduating a virgin? Still have 24 hours. Roommate's mom very hot. Swear she's checking me out. There was that Rob Lowe movie.

Being here today, on a sincere note, is very special for me. I do miss this place. I especially miss Harvard Square. Let me tell you, (you don't know this) Harvard Square is unique. Nowhere else in the world will you find a man wearing a turban and a Red Sox jacket working in a lesbian bookstore. I'm just glad my dad's working.

It's particularly sweet for me to be here today because—this is true—when I graduated I wanted very badly to be a Class Day speaker. Unfortunately, my speech was rejected. So if you'll indulge me, I'd like to read a portion of that speech. This is the actual speech from 15 years ago. "Fellow students, as we sit here today listening to that classic A-ha tune which will definitely stand the test of time, I would like to make several predictions about what the future will hold. I believe that one day a simple governor from a small southern state will rise to the highest office in the land. He will lack political skill, but will lead on the sheer strength of his moral authority. I believe that justice will prevail and one day the Berlin Wall will crumble, uniting East and West Berlin forever under Communist rule. I believe that one day a high-speed network of interconnected computers will spring up worldwide, so enriching people that they will lose their interest in idle chitchat and pornography. And finally, I believe that one day I will have a television show on a major network seen by millions of people at night which I will use to reenact crimes and help catch at large criminals." Then I had a section on the death of Wall Street, but you don't need to hear about that.

The point is that although you see me as a celebrity, a member of the cultural elite, a demigod if you will, and potential husband material, I came here in the fall of 1981 and lived at Hollworthy Hall as a student much like you. I was, without exaggeration—this is true—the ugliest picture in the freshman facebook. When Harvard asked me for a picture the previous summer, I thought it was for their records, so I jogged in the August heat to a passport photo office and sat for a mugshot. To make matters worse, when the facebook came out, they put my picture right next to Catherine Oxenberg, a stunning blonde actress who was expected to join the class of '85, but decided to defer admission so she could join the cast of Dynasty. Folks, my photo would have looked bad on any page, but next to Catherine Oxenberg, I looked like a mackerel that had been in a car accident.

You see, in those days, I was 6 feet 4 inches tall and I weighed 150 pounds. True. Recently, I had some structural engineers run those numbers into a computer model and according to the computer I collapsed in 1987, killing hundreds in Taiwan.

After freshman year, I moved to Mather House. Mather House, incidentally, was designed by the same firm that built Hitler's bunker. In fact, if Hitler had conducted the war from Mather House, he would have shot himself a year earlier. Saved us a lot of trouble.

Fax Test Report

4 Jan 2016 18:02

The fax detects an active telephone line **Fail**

An active phone line was not detected

Please check the items below and then rerun this test

HP recommends using the telephone cord that came with the product

Verify that the fax cord is securely connected between the telephone jack and the product (or another device that is connected to the product)

Disconnect the product from the jack in the wall and then connect a telephone to the jack. Try to make a voice call to verify that the telephone line is working

Connect the product to a different phone line

Try a different phone cord

Remove any phone line splitters that are in use

Ensure that a filter is installed if using DSL

Instructions on how to rerun this test
Step 1. Press the [Setup] button
Step 2. Select "Service"
Step 3. Select "Fax Service"
Step 4. Select "Run Fax Test"

How Can I Test My Fax Machine?

I just hooked up a new fax machine, and I'd like to test it, just to make sure it works. How can I do that?

Presumably, you want to test your fax machine by sending a fax from it and receiving a fax with it. Here's how to do both.

To test the send functionality of your fax machine, send a one-page fax to 1-888-877-1655 (a toll-free number in the United States.) When it's finished transmitting, point your web browser to Fax Toy — it's a fun web site that displays whatever is faxed to that number. Within a minute, your fax should appear on the site. Click the thumbnail to see a large version.

To test the receive functionality of your fax machine, point your web browser to FaxZero. this site lets you send faxes for free to anywhere in the United States and Canada. Within a few minutes, your fax machine should ring — hopefully, it will automatically answer and spit out the test fax.

From: Human Resources Department

Re: Absence Reporting Guidelines

As you know, the Boston Public Schools requires all employees to enter an absence in the automated ABSOP system when they are not at their regular work assignment. This applies to ALL absences (including partial days) including personal illness days/sick appointments, appointments, family illness, vacation days, personal business (including conferences), funeral (family and non-family) union business, etc.

This applies to ALL employees for any absences for any reason, with or without the need for a substitute.

Please review the following guidelines:

→ All employees must enter an absence as soon as they are aware of the need to be away from their work assignment but at a minimum, no later than one hour prior to the start of their workday.

→ You may report your absence by phone to ABSOP (toll-free) however, internet is preferred (www.absop.bps.com, username: your employee ID, password: your birthdate in MMDDYY format).

→ If an employee has a change to an absence, the employee is required to make that change up to 11 a.m. the day of the absence. If s/he, that day of absence you must report the change to your building coordinator to make the change in your absence record.

→ Employees must enter an absence themselves. NO building coordinators or supervisors will enter your absences. You are responsible to enter your own absences in ABSOP.

→ No verbal or informal agreements made between employees and substitutes without completing the substitute assignment process in ABSOP is prohibited. You may be subject to discipline if you do not follow this procedure.

→ If you have questions or problems, please contact HR.

→ In emergency situations, contact Jennifer Wray for assistance at 617-635-9611 during business hours.

→ The "Report for Leave of Absence" paper forms are no longer used. You can complete the form online or the ABS manual. Additionally, these forms need to be completed for all personal business, sabbatical and vacation time requests.

Thank you for your cooperation.

4 3.1 CREATING A CONFERENCE CALL

When your telephone is joined together with several other telephones on the same call, the effect is called conferencing. You can make conference calls that involve up to five parties, including you as the originating party, in any combination of outside lines and intercom parties

Note. When setting up a conference call with outside lines and internal telephones, you must call the outside lines first.

- **To set up a conference call that includes both outside lines and intercom parties, outside lines alone, or intercom parties alone,**

Setting a Conference

1 **MAKE** first call.
2 **PRESS** *TRNS/CONF* (call is placed on hold automatically)
3 **MAKE** next call.
4 **PRESS** *TRNS/CONF* to establish conference
5 **REPEAT** the last three procedures to add up to two more parties, establishing a 5 party conference (including yourself)

- **To continue conversation on remaining line after other outside lines have dropped out of conference,**
  —**PRESS** the line button of the remaining party

Testing 1 2 3

So, given the reasonably proprietary knowledge needed to respond to NSF and the universal ability to ignore it and continue with a DIS/DCS controlled call what's the problem? The problem is something called demodemod. Virtually all the high capacity leased phone networks use some type of translation device to change the T.30 messages of a fax into an intermediate protocol [demodulation] so that they can achieve their transmission performance advantages over the standard PSTN once that protocol is changed back into T.30 (remodulation). This has become even more pointed with the advent of Voice over IP (VoIP) wherein the switched circuit PSTN is replaced by the switched packet Internet which requires a gateway of some sort to convert signals between them. Of late the intermediate protocol of choice has become T.38 transferred by UDP/IP packets. As long as the gateways that have to perform this unloading have a T.30 fax call to work with, all, well and good. But what happens when the originating device communicating through a pair of these gateways discovers an NSF message from an answerer that it recognizes and responds to with an NSS and a blast of proprietary page code? The gateways simply throw up their hands and go out for a beer

A VoIP gateway becomes by nature of its operation a fax terminal. It has to field a T.30 call as though it were either answering the call (connected to the originating terminal) or originating the call (connected to the answering terminal). In point of fact, a pair of gateways may sustain two simultaneous fax calls between themselves and the two fax terminals while transferring the T.38 intermediate protocol content between their IP ports. There is no space here to handle NSF/NSS. For this reason, gateways of all types, VoIP and otherwise, either zero out the content of the NSF message or delete it entirely from each fax call they carry. This assures that these fax calls stay within the T.30 protocol and limits their support of fax to dealing only with the vagaries of T.30's implementation in the terminals.

It sounds like a good solution right up until the user, who actually bought identical fax machines intends to send three high-speed, clean page transmissions over the PSTN continues them to his VoIP gateways and is incensed that all his wonderful performance has evaporated!

In the late 70s, T.30 was created to make fax machines something they had never been before, interoperable. But many of their manufacturers wanted to go outside of T.30 and continue to use some of their non-standard tricks and abilities. The integrated circuit had begun to make good on its promise to produce a bounty of affordable consumer electronics. This meant that fax machines could go from being serious, proprietary and extremely expensive to counterfeiters – if only their makers could get over the temptation to make their units different in a way no one else could work with. Clearly a compromise was called for

The T.30 facsimile protocol was created with many of its tolerances specified loosely enough to accommodate most of the odd timing and compression of timing and signal content that had plagued fax interoperability since the inception of its market. In numerous places, it was carefully written to be as generally accepting as was possible and still support the desire for later-generation that caused it to be created in the first place. What it couldn't do was accept all manner of odd page image resolutions, strange encoding and outright changes to the signal flow between terminals. Those manufacturers who really wanted to use their deeply proprietary

QUEEN PALM CARE GUIDE

Easy as 1-2-3

Queen Palms are some of the most beautiful and most popular palms grown here in the desert. If given proper care, they will always be as green and full as when purchased.

1. WATERING

By far, proper supply of water is the most important ingredient for the well being of Queen Palms here in the desert. Queen Palms are tropical-like palms, native to much wetter areas of the world. They can handle the extremes of our desert temperatures but as noted more water than nature provides. For most palms that don't appear healthy lack of properly applied water contained with nutrient deficiencies is usually the cause. A good rule of thumb is that it's practically impossible to over water a Queen Palm, especially during the intense heart of summer months!

When applying water wider is better! As a Queen Palm matures, it's roots spread wide but not much deeper than 18 to 24 inches. So make sure that as your tree grows to apply this water wider every year. A good rule of thumb for this is to water an area at least ½ to 1 times as wide as the trunk diameter.

How often to water depends on many variables including current temperatures, soil conditions and recent rainfall to name a few. To keep a good, happy level of moisture for Queen Palms, basic watering guidelines are as follows:

Season / Temp Range	Watering / per week
Summer / Above 100	4 to 5 times per week
Fall / 85° to 100°	2 to 3 times per week
Winter / Below 85	1 to 2 times per week
Spring / 85° to 100°	2 to 3 times per week

NOTE: These are guidelines. Adjustment and modification is made. Example: right after planting, you'll want very water - two or three times per week. Leaves wilting and very hot days - water more. Every new addition to applied water.

2. FERTILIZING

Keeping Queen palms healthy has never been this easy!

Don't fall for expensive injections or spikes that may lose its nutrients to soil. We've taken the guesswork out of feeding Queen Palms! Our Super Palm Juice® has all of the major & micro nutrients to keep palms green & healthy in an easy to use liquid format that reaches the roots FAST!

Super Palm Juice is great for all varieties of palms and is an affordable must for Queen Palms!

3. TRIMMING

Only remove fronds that hang downward (below horizontal). Simply cut front about 2"-3" from trunk, using a cut that is parallel to the trunk. During Summer months, it is common to get some brown tips. It's o.k. to keep trim off the brown and leave the green portion of the frond. Trimming is usually only necessary once or twice a year.

OBJECTIVE

To obtain a position that will use my experience and creativeness to better the organization and their clients.

EXPERIENCE

2/08 - 12/08 Audrey Signs, Inc. New York, NY

Operations / Project Manager

- Improved sales and customer service.
- Streamlined design and production process.

Security of OWA

Will someone be able to pull up the browser and access my e-mail after I leave my computer?

NO If you close out the browser the connection is broken Also after 30 minutes of inactivity the connection is broken

Performance of OWA

Factors outside of the control of IT that might slow down your performance are:

- The PC you are using
- What you have running on your PC (firewall anti-virus system tools software configuration etc.)
- How your PC is configured
- Your connection to the Internet
- Your Internet Service Provider (ISP)
- What is between you and Cinergy on the Internet
- Internet traffic levels
- The size of messages and folders that you are viewing
- Etc.

Just like your experience varies from day to day minute-to-minute browsing the Internet, so will OWA. IT constantly monitors the Exchange environment for many different things paging support at certain thresholds. If there are problems they are usually quickly identified and corrected

Are PeoplePC and OWA related?

NO. People PC and OWA are TWO DIFFERENT PROGRAMS!

PeoplePC

Cinergy has teamed with PeoplePC to provide computers and access to the Internet to employees at a greatly reduced rate These PCs include Windows Millennium and Microsoft Works (among others) These are similar to BUT NOT THE SAME as Windows 2000 and Office 2000.

DO NOT copy files (Word documents, Excel spreadsheets) that you are working on at work in Office 2000 (or 97) to Microsoft Works and back again When you copy it back into Office the files will be corrupted

Outlook Web Access (OWA)

Outlook Web Access (OWA) is a Cinergy program that allows you to access your company outlook files (mail, contacts, etc.) from any PC with access to the Internet

Random Stuff Sent From Your Fax Machine
Fax something interesting toll free to 1-888 877 1655 or 1 503-200-1300

To the right are pages that folks have faxed us recently. Click any thumbnail to see the large version and rate it for interestingness.

You can fax something interesting to 1 888 877 1655 (your boss will never notice... maybe) or 1 503 200-1300 (long distance to Portland, Oregon) and it should appear here within a couple of minutes. (If it's a toll free number if you're in the USA.) Keep it clean & legal.

Fax single page documents with no cover sheet. If you fax more than one page, only the last page will appear here. We try to snip off the top few pixels of the page where your company name and fax number should appear, but make no promises that this will actually work.

Privacy Policy. We hate spam and junk faxes, and will absolutely not send you any unsolicited e-mail or faxes. We won't share your information with marketers or anyone else.

Testing Your HP Fax Machine with the HP Fax Test Service

Introduction

This document will help you test your HP® product for use with the HP Fax Test Service.

Print this document if you may need to refer to it after the Print Quality Verification Service page is no longer visible.

Test your Fax machine

To test the capability of your fax machine, follow the directions below.

NOTE: Before you test your phone number, be sure Caller ID is blocked by your telephone service provider. Alternatively, you can disable Caller ID blocking by entering *82 before dialing the HP Fax test number. Some Caller ID blocking features are not disabled. Other phone company services may prevent your fax machine from answering, including voice mail, call blocking, or Caller Name Delivery features.

NOTE: Where an invalid or busy tone is detected, it is typically recommended that the user wait a minute or two before attempting a redial. This is to avoid the user from receiving a fax failure error code. To generate the test call, please refer to the following. This section is applicable to Group 3 fax machines only. Please consult your product user guide for specific steps.

1. Send a test call to the HP Fax Test Service number (+91-080-67705071 or +91-080-43115151).
2. When you hear instructions from the HP Fax Test Service, you will generate a test fax to the service. The service will then send you a fax confirming that your fax machine is able to dial out and successfully receive a fax via your fax machine.

If you do not receive a confirmation fax within 24 hours, it may be the case that the setup of your fax machine is not correct. Consult the user manual that came with your product for specific setup and configuration.

NOTE: The most common reason for failure is that the fax number entered into the test call does not match the number of the phone line used. Also make sure that the fax header contains the full 10-digit telephone number of the fax machine, including the area code.

For more information, click **Contact HP** at the top of this page.

Aaaaaahhhhh!!

volume 21 page1157 1158 under topic "Time Standard," last paragraph page 1157 "The advantage of adopting a continuous reckoning of the hours from 0 to 24 instead of using the divisions A.M. and P.M. is obvious, and this reckoning has been adopted for many public services as to when 0 hour occurs. Astronomers from time immemorial have used a 24 hour reckoning **beginning at noon** but for civil purposes [page. 1158] it has seemed more natural to count from midnight. At the meeting of the International Astronomical Union in 1922 astronomers were recommended to use time beginning at Greenwich midnight from 1925 ... it was recommended that anyone who still wanted to use time counted from noon should call it Greenwich mean **astronomical** time (GMAT).

Third. This is a restatement of the first point above. How can anyone possibly exercise **Rights of Christian Authority** when we yield jurisdiction by way of exclusive use of "their" fictional "unjust measurements" of **Pope Gregory's calendar**? Can you tell me it is a **"Just Measure"** when one month is 28 days, ohhh and, sometimes 29 and other months are 30 or 31 days? PEOPLE... THEY" MEASURE TIME BY THE FICTIONS! (And, they're named after other "Gods") Deuteronomy 25:13 *Do not have two differing weights in your bag, one heavy, one light.* 14 *Do not have two differing measures in your house—one large, one small.* 15 *You must have accurate and honest weights and measures, so that you may live long in the land the LORD your God is giving you.* 16 *For the LORD your God detests anyone who does these things, anyone who deals dishonestly.*

An "autonomous" governmental organization yields no jurisdiction to any fiat, fake fiction, faux or other legal entity that is not originated by under and for a true Trust, which is ordered under the Laws of Nature and Natures Creator which adopts, adapts, and adheres to a **"True Calendar"** with the stipulation that a Day begins at High Noon when the "Evening" is truly "Even" said participants shun and will not recognize (gives no "cognizance" to), any all form(s) of imaginary fiat, fake fiction and/or conjured calendars that initiate uneven measures of time.

The "True Calendar" identifies a year by counting the number of years passed since an **estimated** ascension date of our Lord, which begins its number at noon, the day of the Spring Equinox (Exodus 12:2) The common prefix, A.D. may be used in the True Calendar System (AD BC BCE, etc.)

Those "escaping from Egypt" recognize two (2) Deities and do NOT recognize any god(s), whatsoever; however said participants give total cognizance to The Anointed One our Messiah whose earthly appellation was thought to be Yahshua, who is "after the Order of Melchizedek, the same One who many refer to as "Jesus" and our Supreme Creator who made reference to Himself as "I Am."

Said "escapees," as "Joint Heirs" with The Anointed One and "Heirs Elect" of the Kingdom of Heaven and citizens together in the Commonwealth of Israel (Ephesians 2:12), do recognize that all People, and not legal entities form a society of a Brotherhood of Man Kind and thus are "Heirs Elect" of the Only True Sovereign and Supreme

Our Ref. 350/PJC/EAC

Dr P N Cundall,
Mining Surveys Ltd.,
Saltoyd Road,
Reading,
Berks.

Dear Pete,

Permit us to introduce you to the facility of facsimile transmission.

In facsimile a photocell is caused to perform a raster scan over the subject copy. The variations of print density on the document cause the photocell to generate an analogous electrical video signal. This signal is used to modulate a carrier, which is transmitted to a remote destination over a radio or cable communications link.

At the remote terminal, demodulation reconstructs the video signal, which is used to modulate the density of print produced by a printing device. This device is scanning in a raster scan synchronised with that at the transmitting terminal. As a result, a facsimile copy of the subject document is produced.

Probably you have uses for this facility in your organisation.

Yours sincerely,

Phil.

About Social Security and Medicare...

Social Security pays retirement, disability, family and survivors benefits. Medicare, a separate program run by the Centers for Medicare & Medicaid Services, helps pay for inpatient hospital care, nursing care, doctors' fees, drugs and other medical services and supplies to people age 65 and older as well as to people who have been receiving Social Security disability benefits for two years or more. Medicare does not pay for long-term care so you may want to consider options for private insurance. Your Social Security check cannot be garnished, even for both programs. For more information, your Medicare, visit *www.socialsecurity.gov* or call **1-800-633-4227** (TTY **1-877-486-2048**) if you are deaf or hard of hearing).

Retirement — If you were born before 1938, your full retirement age is 65. Because of a 1983 change in the law the full retirement age will increase gradually to 67 for people born in 1960 and later.

Some people retire before their full retirement age. You can retire as early as 62 and take benefits at a reduced rate. If you work after your full retirement age, you can receive higher benefits because of additional earnings and credits for delayed retirement.

Disability — If you become disabled before full retirement age you can receive disability benefits after six months if you have:

- enough credits from earnings (depending on your age, you must have earned six to 20 of your credits in the three to 10 years before you became disabled); and
- a physical or mental impairment that is expected to prevent you from doing "substantial" work for a year or more or result in death.

If you are filing for disability benefits, please let us know if you are on active military duty or are a recently discharged veteran, so that we can handle your claim more quickly.

Family — If you're eligible for disability or retirement benefits, your current or divorced spouse, minor children or adult children disabled before age 22 also may receive benefits. Each may qualify for up to about 50 percent of your benefit amount.

Survivors — When you die, certain members of your family may be eligible for benefits:

- your spouse, age 60 or older (50 or older if disabled, or any age if caring for your children younger than age 16); and
- your children if unmarried and younger than age 18, still in school and younger than 19 years old if a child of yours adopted before age 22.

If you are divorced, your ex-spouse could be eligible for a widow's or widower's benefit on your record when you die.

Extra Help with Medicare — If you know someone who is on Medicare and has limited income and resources, extra help is available for prescription drug costs. The extra help can help pay the monthly premiums, annual deductibles and prescription co-payments. To learn more or to apply, visit *www.socialsecurity.gov* or call **1-800-772-1213** (TTY **1-800-325-0778**).

Receive benefits and still work...

You can work and still get retirement or survivors benefits. If you're younger than your full retirement age, there are limits on how much you can earn before it affects your benefit amount. When you apply for benefits, we'll tell you what the limits are and whether work would affect your monthly benefits. When you reach full retirement age, the earnings limits no longer apply.

Before you decide to retire...

Carefully consider the advantages and disadvantages of early retirement. If you choose to receive benefits before you reach full retirement age, your monthly benefit is reduced.

To help you decide the best time to retire, we offer a free booklet on *When To Start Receiving Retirement Benefits* (Publication No. 05-10147) that identifies the main factors you should consider before applying. Most people can receive an estimate of your benefits based on their actual Social Security earnings record by going to *www.socialsecurity.gov/estimator*. You also can calculate future retirement benefits by using the Social Security Benefit Calculators at *www.socialsecurity.gov*.

Other helpful free publications include:

- *Retirement Benefits* (Pub. No. 05-10035)
- *Understanding The Benefits* (No. 05-10024)
- *Your Retirement Benefit: How It Is Figured* (No. 05-10070)
- *Windfall Elimination Provision* (No. 05-10045)
- *Government Pension Offset* (No. 05-10007)
- *Identity Theft And Your Social Security Number* (No. 05-10064)

We also have other leaflets and fact sheets with information about specific topics such as military service, self-employment or how an employer can report your earnings. You can request Social Security publications at our website, *www.socialsecurity.gov*, or by calling us at **1-800-772-1213**. Our website has a list of frequently asked questions that may answer questions you have. We have easy-to-use online applications for benefits that may save you a telephone call or a trip to a field office.

You may also call for government benefits outside of Social Security. For more information on these benefits visit *www.govbenefits.gov*.

If you need more information — Visit *www.socialsecurity.gov/agreement* for the Internal Revenue Service's address or Social Security office call **1-800-772-1213** or write to Social Security Administration Office of Earnings Operations, 1 G Hus 13026 Baltimore MD 21290-3026. If you're deaf or hard of hearing, call TTY **1-800-325-0778**. If you have questions about your personal info mation you must provide your complete Social Sec ity number. If your address is incorrect call the Internal Revenue Service to send you a Form 8822. We don't keep your address if you're not receiving Social Security benefits.

How Can I Test My Fax Machine?

I just hooked up a new fax machine, and I'd like to test it, just to make sure it works. How can I do that?

Presumably you want to test your fax machine by sending a fax from it and receiving a fax with it. Here's how to do both.

To test the **send** functionality of your fax machine, send a one-page fax to 1 855 329 1279 (a toll-free number in the United States). When it's finished transmitting, send your web browser to Fax Toy. It's a fun web site that displays whatever is faxed to that number within a minute, your fax should appear on the site. Click the thumbnail to see a larger version.

To test and **receive** functionality of your fax machine, point your web browser to FaxZero; this site lets you send faxes for free to anywhere in the United States and Canada. Within a few minutes, your fax machine should ring — hopefully it will automatically answer and spit out the test fax.

Canon

EN Safety and Important Information

some the first!

This important notice and the safety precautions that you should review are described in this manual.

Please keep this information to hand for future reference.

The latest information of the product is available at Canon local website.

■ In Reference to Manual Configuration

1 Paper manual for setup

Read This Manual for the Installation

2 On-screen Manual / Online Manual

Read These Manuals for the Operation

- On-screen browser is a manual which will be available after the installation of setup CD is completed. It provides some operation of the product and its specification, system requirements, maintenance tips, regulatory environment, safety and other useful to some information. Regulatory information is available from the top-page of the On-screen manual.
- Online network is the browser based manual over the Internet. Please read this manual for the same detail information on how to operate the software, troubleshooting, and so on.

■ Important Notice

When this product is connected to a network, network-based, such as some router or wireless router are required depending on its configuration. The wired LAN connection is available with some products and LAN cable is required in this case.

For computers without a CD/DVD drive, please visit Canon local website to download and install the printer software.

■ Shipping the Product

This product may not be used at countries or regions other than the country or region where it was purchased due to local laws and regulations. Please note that the use of this product in such countries or regions may lead to penalties and that Canon should not be liable for such punishment.

■ Notes for Energy Saving Setting

For purpose of energy saving, the product will be automatically turned off after designated hours without operation (The Auto Power Off function).

For instructions on how to change the setting, refer to the On-screen Manual.

■ About Consumables

Consumables (ink tanks / PINE Cartridges) are available for 5 years after production of the machine has ceased.

■ Caution for each safety standard mark and declaration

Each safety standard mark and declaration is valid only for the the voltage and frequency of the respective country or region where it applies.

⚠ Safety Precautions

Please read these safety warnings to ensure that you use the machine safely. Do not attempt to use the machine in any way not described here or in the accompanying manuals. This may cause unexpected accident, fire, or electric shock.

Refer to the On-screen Manual as well for other precautions not specified in this manual.

THE DOUBLE HELIX

~CLASS~ SET

This plate illustrates the double helix structure of DNA proposed by Watson and Crick and widely accepted today as correct. To allow a better view of the parts of the molecule, the spaces between base pairs has been greatly exaggerated. The upper and of the illustration is highly diagrammatic and shows the overall relations of the parts, while the lower portion shows the structural formula with all of the individual atoms and their bonds.

Color the headings Simplified Structure and Uprights/Backbone titles D and F, and the associated structures in the upper portion of the plate Use light colors for D and F

The structure of the DNA molecule is often compared to that of a ladder that has been twisted. The *deoxyribose* and *phosphate groups* alternate continuously the whole length of the molecule and form the "uprights" of the ladder (sometimes called the "backbone")

Color the heading Rungs/Base Pairs, titles A, T, C, G and H, and their associated structures in the upper portion of the plate. Use light colors for A, T C, and G.

The base pairs occupy the position of the "rungs" of the ladder although in the actual molecule they are tightly packed on top of one another as no ladder rungs ever would be. The *particular sequence* of the *four* different bases constitutes a "code" in which specific hereditary information is recorded. The method by which that code is translated to specify the exact sequences of amino acids to be used in making the cell's proteins will be covered in the next few plates.

The helix shown here, called the "B-form," is the most stable and therefore the most common structure for DNA. In recent years it has been discovered that local regions of DNA may form a slightly more open helix called the A-form and in some cases a very different left-handed helix called the Z-form. (The significance of these alternate forms is not known.)

The average length of DNA in a human chromosome is about 140 million base pairs or 14 million turns of the helix. If laid out in a straight line, it would be about 4.8 centimeters long (just under 2 inches)

Color the heading Structural Formula and the remainder of the plate

The structural formula shows more clearly which atoms are attached to which. These details may or may not be important to you, depending on your reasons for studying this plate, but they are important to the cell because any deviation will result in some kind of mutation or even the death of the cell

To clarify the exact interconnections of the various atoms, this view shows the base pairs and the ribose subunits rotated 90 degrees from their actual orientation in the molecule. You will note that each base is attached to carbon number 1 of its deoxyribose molecule. To facilitate discussions of the structure of DNA, this carbon atom is designated as carbon 1 ("one prime") to distinguish it from the carbon atom number 1 of the base. The phosphates, then, are attached to carbons 3' and 5

Note also that the directions of the sugar and phosphate uprights or backbone are "antiparallel": that is, the chain on one side runs in the opposite direction to the chain on the other side. On one side, the 5' carbon of each ribose connects by way of a phosphate group to the 3 carbon of the ribose above. On the other side, the 5' carbon of each ribose connects by way of a phosphate group to the 3 carbon of the ribose below. Thus the chains progress in the direction 5' to 3 up the helix on one side and 5 to 3 down the helix on the other side. At each end of the DNA molecule, then, one strand will end with a 3'-OH and the other will end with a 5'-phosphate.

In 1958 Watson, Crick, and Wilkins received the Nobel Prize in physiology and medicine for this discovery of the structure of DNA. It was an extremely important achievement because, as Watson and Crick pointed out in their paper announcing the discovery, not only could such a structure carry genetic information coded in the varying sequence of the bases, but there was also an obvious mechanism by which the molecule could be self-replicating, so that exact copies could be supplied for each daughter cell in cell division.

Introduction

This document will assist you in testing your HP Fax machine using the HP Fax Test Service.

Print this document for easy reference by clicking the **Printable Version** link in the upper right corner of the page

Test your fax machine

To test the capability of your fax machine follow the directions below

NOTE. Be sure that your phone number is not Caller ID blocked by your telephone company prior to attempting to send and receive a fax. Pressing *82 before dialing the toll free number will unblock the Caller ID blocking feature in most areas. Other phone company services can prevent you from receiving a fax, including voice mail, call blocking, or call privacy features.

NOTE. Whenever troubleshooting a fax issue, it is good practice to set the *Automatic Reports* option to **Every Error** before attempting a test fax. This way, even if the test fax fails, an error note will be generated that will guide you in future troubleshooting. The option is available in different places on different products (consult the product *User's Guide* for specific steps.

1. Send a one page plain and white text fax to **1-888-fxtoone** (1-888-473-2663).
2. When your fax is received by the HP Test Fax Service we will generate a return fax to you within five minutes confirming that we received your fax. This verifies that you can both send and receive a fax with your fax machine.

If you do not receive a return fax within 5-7 minutes, there may be a problem with the setup of your fax machine. Consult the user manual that came with the product for proper setup and configuration.

NOTE. The most common cause of failure is that the fax number set in the Fax Header on the machine does not match the number of the phone line connected to the fax. Also, ensure that the fax header contains the full 10-digit telephone number of the fax machine, including the area code.

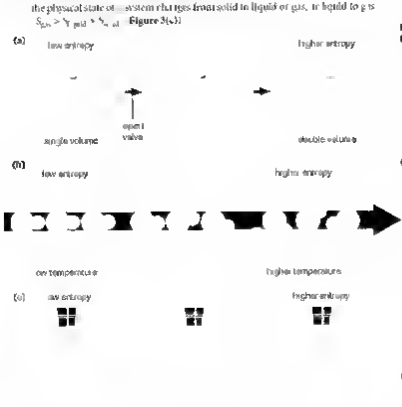
SUMMARY Predicting the Sign of ΔS

[illegible] will experience an increase in entropy ($\Delta S > 0$) if

- the volume of a gaseous system increases (Figure 3(a)),
- the temperature of a system increases (Figure 3(b)), or
- the physical state of a system changes from solid to liquid or gas, or liquid to gas ($S_{gas} > S_{liquid} > S_{solid}$) (Figure 3(c)).

Figure 3
(a) When a gas expands into a larger volume, the gas particles move randomly to achieve a more probable, less ordered (higher entropy) state.



(b) As temperature increases, the random movement of particles increases, and the entropy of the system increases.

(c) As a substance changes from a solid to a liquid to a gas, the entropy of the system increases because the particles become more randomly distributed.

In chemical reactions, entropy increases ($\Delta S > 0$) when

- fewer moles of reactant molecules form a greater number of moles of product molecules

$$2NH_{3(g)} \rightarrow N_{2(g)} + 3H_{2(g)}$$

- complex molecules are broken down into simpler substances (e.g. combustion of organic fuels into carbon dioxide and water)

$$C_6H_{12}O_{6(s)} + 6O_{2(g)} \rightarrow 6CO_{2(g)} + 6H_2O_{(g)}$$

- a liquid reacts to become a liquid or gaseous products, or liquids become gases

$$2H_2O_{(l)} \rightarrow 2H_{2(g)} + O_{2(g)}$$

3 (optional) For greater security, use the security button atop each Adapter.

a) While both Adapters are plugged in, press the security button atop both units for 10 seconds (not necessarily at the same time). The Security lights will blink.

b) Next, press the security button on one Adapter for about two seconds.

c) Within two minutes, press the security button on the other Adapter for about two seconds. The new password has now been saved to the second Adapter.

d) To add VideoLink Powerline Adapters to your secure network, repeat steps b) and c) beginning with one of the Adapters that is already on your secure network.

Installation is complete. If step 3 was not done, you may add VideoLink Powerline Adapters to the network by plugging them in

CALIFORNIA ADDENDUM

SELECTION OF SETTLEMENT AGENT

In connection with the Buyer's purchase of the Property, Buyer has the right, under the "Buyer's Choice Act" to make an independent selection of the entity that will act as Escrow/Closing agent and also the title insurer from which Buyer will purchase an owner's and lender's title insurance policy. Notwithstanding any provision herein and to the extent Buyer elects not to obtain its own Title Commitment, Seller shall select a title insurance company to issue the Title Commitment to Buyer, and Seller shall pay for the cost of issuance of said Title Commitment and the final owner's title insurance policy. The Selection of said title insurance company by Seller shall not prohibit Buyer from purchasing its own title policy or Title Commitment. Buyer is aware of the custom or practice in the geographical location of the Property. If the Buyer selects a title insurance company or closing agent different than the one selected by Seller, Seller shall not be obligated to pay the cost of Issuance of said title commitment or the final title insurance policy based on the information contained in this addendum.

Windows® Fax and Scan

One place to scan and fax your documents

FAX: You can send and receive faxed documents on your computer without using a fax machine. You can also print, e-mail, or save a copy of your faxes.

To get started:

1. Connect a phone line to your computer.

   If your computer needs an external modem, connect the phone to the modem, and then connect the modem to your computer.

2. On the toolbar, click **New Fax.**

3. Follow the instructions in the setup wizard to connect to a fax modem, and then, when you're finished, create your fax.

To connect to a fax server, or one of a modem, connect your system administrator. For more help with faxing, click the **Help** button on the toolbar.

SCAN: After you add a scanner to your computer, you can preview documents or pictures before you scan them, and then adjust your scan settings for better results. You can also fax or e-mail scanned files to someone else.

To get started:

1. Connect your scanner to your computer by following the instructions that came with your scanner, and then place a document or picture on the scanner.

2. In Windows Fax and Scan, at the bottom of the left pane, click **Scan.**

3. On the toolbar, click **New Scan.**

4. Choose the scan settings you want to use, and you're ready to scan.

Use the options on the toolbar to fax, e-mail, print, or copy scans at any time. For more help with scanning, click the **Help** button on the toolbar.

members and worry that this short-term demand may decrease with decreased help work. Then, worry that the success of early organizations will be limited beyond what the quality of their work alone would suggest, as the potential of new members is given to their own. Thus, for society but their organizations will be willing to risk the very people and resources that are necessary for the long-term survival of the organization. Research on the Women's Movement and Feminist Scholarship between the Right-Wing Backlash and Feminist Scholarship studying a specific breaking the backlash within the women's movement addresses the process of success and unsuccessful organizations through comparisons of the structures of two organizations.

The second source of conflict over internal issues between agencies sometimes occurs when two agencies have had a previously strong working relationship, but a conflict by new managers or by personal changes in leadership in goals and priorities. Indeed, many people who were the social service contacts between workers and clients, such as nursing, became relationships as the staff of different city and organizations, with the participation, on their own, among planning the need for no cost-full personal and by-required from above. This is a common problem especially given when a new leader assumes a relationship, part of an aggressive effort to manage the work in organizations or worlds.

Third, broad objective frames, as every other activity on the working agenda with the diversity of an organization's leadership, rather than the needs of the collaboration. The second issue has a close relationship, where the brand, the reputation, has become a standard of organizational personality in the leadership, rather than a tool for the building the institution, says Rudiverse Pulver, president, of the Minister Institute. We also found a broader issue in the brand, agencies sometimes driven by values that are undefined and the engaged, rather "Can projects like these values" seem to result in suffering a organizations that is good people's investment," says Atkinson. Perhaps, but, these issues pose a distinction of the value they're recommending, which might be an inherent to self-sacrifice, boosting effort.

The main theme connecting these organizational issues appears to their work equally as an inherent and collaborations, by their own organizations. A powerful brand will overshadow the weaker brand and reinforcing, rather than contrasting, it shall create of power among institutions. When type symposium issues that your agency has come from all the rest of your by, brand management by the larger organization can lead to the weaker organization's collapse, and these issues by brand, other brand management a bad reputation. As Burrows Smith, the executive of Accelerated and new work Opportunity in Oklahoma, notes "There's a tension between bigger brands and smaller brands. The biggest is the community. We and what it requires (generally) put it first, even "small issues, to the detriment of other organizations that can become invisible, and let's always reconnect."

Beyond these problems, many of these conversations of the agency reveals a response, the agreement yielded to the nonprofit sector practice of the culture of organizations, public impact capacity planning, public risk, we where this refers organizational and those and profile in organizations where. The Stanford Social Innovation Review, a source of practical advice in the collaborative role that brand plays in the cooperative sector, is an excellent resource.

BRANDS BRING COHESION AND CLARITY

Just as Starbucks employees let us in on the inner workings of guide the brand enthusiasts we interviewed learned of internal conversations in the language and voice that brand plays inside nonprofits to create organizational cohesion and build capacities.

Many of our interviewees told us that a brand plays a different role with different audiences. Internally, the brand establishes the identity of the organization, encouraging an understanding and differentiation. Jim Fitzhenry, who co-chaired the Canadian Global Identity project, a Canadian organization, puts it this way: "If you don't know where you're going and why you're relevant, you don't have a brand." Conversely, the brand reflects the image held in the minds of donors, most notably the stakeholders, our members, users and supporters but also those in order to influence public opinion.

A nonprofit's brand is most essential when the organization is operated internally, and external images are aligned with user needs and marketing visions and missions. As Steve Cunningham Dickson, Habitat for Humanity's director of communications, explains, "Brand is the organization's identity and external image that can be leveraged for other building efforts to nonprofit organizations."

The result of alignment is passion, values, identity, and image of a shared people, strategies and goals, and achieving diverse internal and external issues. When an organization's employees are believers and audience awareness brand identity. It creates a reliance of customers, consumers, and audiences, and interfaces shared values. As Marina Marsh, chief operating officer of the World Wildlife Fund (WWF) in the United States puts it: "Our brand is the single greatest asset that our network has and it's what keeps everyone together." The result of that alignment and clarity in positioning to generate trust between the organization and its partners, beneficiaries, participants, and donors. Like a nonprofit, organizations rely on establishing trusts with many external and internal groups. What you say you do and believe when you try to convince a cause.

Strong cohesion and high levels of trust contribute to greater organizational capacity and social interest. A cohesive organization's members make more efficient use of their skills, resources, and high interest. Trust contributes additional talent, financing, and audiences. The increase in organizational capacity enhances organizational social impact, by leveraging the value of partners, beneficiaries, and policy makers, an organization can make greater strides toward achieving its mission. On a big stick, these organizational-level challenges assist of to serve organizational initiatives, or the amount of practice of operational issues, enable greater success of rewards to an unprecedented, stronger, build organizational capacity and an and

How Can I Test My Fax Machine?

I just hooked up a new fax machine, and I'd like to test it, just to make sure it works. How can I do that?

Presumably, you want to test your fax machine by sending a fax from it and receiving a fax with it. Here's how to do both.

To test the send functionality of your fax machine, send a one-page fax to 1-888-877-1655 (a toll-free number in the United States.) When it's finished transmitting, point your web browser to Fax Toy — it's a fun web site that displays whatever is faxed to that number. Within a minute, your fax should appear on the site. Click the thumbnail to see a large version.

To test the receive functionality of your fax machine, point your web browser to FaxZero. this site lets you send faxes for free to anywhere in the United States and Canada. Within a few minutes, your fax machine should ring — hopefully, it will automatically answer and spit out the test fax.

Cuyamaca College Petitions Committee
GENERAL PETITION

The Petitions Committee is composed of representatives from the following areas: Instructional Faculty, Counseling Faculty, Admissions and Records, and Dean of Counseling and Enrollment Services (Chair). The purpose of the Petitions Committee is to review requests from students for interpretation of rules, regulations and policies.

The Committee cannot overturn, ignore, or change existing laws and regulations. The Committee also cannot rule on instructional matters that involve disputes between students and faculty. These issues should be directed to the appropriate department chair.

Comments from the Committee

1. Please provide documentation to support your statements.
2. This deadline is established by State regulations and/or Board policy and generally cannot be waived by the Committee.
3. Situation does not qualify under "extenuating circumstances" (*as defined under California Education Code*.)
4. State regulations generally allow students to repeat a course only if they receive a substandard grade (below "C"). Courses may be repeated twice for this reason without a petition.
5. The College must maintain a complete and accurate academic history. A "W" and all grades are part of your permanent academic history.
6. Only the instructor may change the grade.
7. This is an instructional issue; please see the appropriate Department Chair or Divisional Dean.
8. You may re-petition after successful completion (with a "C" or better) of the prerequisite course.
9. A withdrawal for medical reasons after program change includes a "W" and does not include a refund.
10. See a counselor to review academic policies/educational planning.
11. The Committee cannot rule upon your petition until you submit official sealed transcripts.
12. Your records indicate that you do not meet the requirements for Academic Renewal. Please refer to the criteria in the College catalog.
13. You did not comply with the Committee's request.
14. Contact an Interdisciplinary Specialist in the Admissions and Records office.
15. Approved to repeat course and semester as indicated on front. Grade will not count towards your GPA.
16. Student must enroll in the class and must pay any appropriate fees within 5 calendar days of approval.
17. We will re-instate you in the class; student must pay any appropriate fees within 5 calendar days of approval.
18. Contingent upon Student (1) submitting a signed and dated Add Card; (2) making payment of appropriate fees; and (3) contacting instructor to submit a grade. Student must complete ALL within 5 calendar days of approval.
19. Please clarify your request.
20. No petition needed, please use overload authorization process.
21. For classes where a student has received a passing grade (P, CR or C or better) three years must elapse from the time the class was last taken.
22. Please see additional comments.

bind up the money in thine hand, and shalt go unto the place which the LORD thy God shall choose: 26 And thou shalt bestow that money for whatsoever thy soul lusteth after, for oxen, or for sheep, or for wine, or for strong drink, or for whatsoever thy soul desireth: and thou shalt eat there before the LORD thy God, and thou shalt rejoice, thou and thine household, 27 And the Levite that is within thy gates; thou shalt not forsake him; for he hath no part nor inheritance with thee. 28 At the end of three years thou shalt bring forth all the tithe of thine increase the same year, and shalt lay it up within thy gates: 29 And the Levite, (because he hath no part nor inheritance with thee,) and the stranger, and the fatherless, and the widow, which are within thy gates, shall come, and shall eat and be satisfied; that the LORD thy God may bless thee in all the work of thine hand which thou doest.

De 15.7 If there be among you a poor man of one of thy brethren within any of thy gates in thy land which the LORD thy God giveth thee, thou shalt not harden thine heart, nor shut thine hand from thy poor brother: 8 But thou shalt open thine hand wide unto him, and shalt surely lend him sufficient for his need, in that which he wanteth

De 26:12 When you have made an end of tithing all the tithe of your increase in the third year, which is the year of tithing, then you shall give it to the Levite, to the sojourner, to the fatherless, and to the widow, that they may eat within your gates, and be filled

How Can I Test My Fax Mach

I just hooked up a new fax machine, and I'd like to test it just to make sure it works. How can I do that?

Presumably you want to test your fax machine by sending a fax to it and receiving a fax with it. Here's how to do both.

To test the send functionality of your fax machine, send a fax to Fax Toy (415-230-1239 (a toll-free number in the United States.) When it's finished transmitting, point your web browser to Fax Toy — it's a fun site that displays whatever is faxed to that number. Within a minute, your fax should appear on the site. Click the thumbnail to see a large version.

To test the receive functionality of your fax machine, point your web browser to Fax Toy — the site lets you send faxes for free to anywhere in the United States and Canada. Within a few minutes, your fax machine should ring — be sure it's set to automatically answer and spit out the test fax.

Please note the following:

Contesting to a Hearing

Not Guilty Plea By pleading not guilty to charges you are requesting that a fact finding hearing be scheduled. Upon a plea of not guilty you will receive notification of a scheduled hearing.

All requests for hearing adjournment must be made in writing and received by the Authority at least three business days prior to the hearing date. If you request an adjournment please clearly state the reason for your request and include a phone number where you can be reached. Adjournments will be granted for good cause only.

If you require an interpreter you must notify the Authority at least five days before your hearing. The Authority will provide interpreters to licensees at no expense.

Proceeding for a Hearing

Licensees and their representatives must appear on the date of hearing unless they have received specific written or telephone instructions from the Authority not to appear.

Licensees must bring acceptable proof of identity such as a driver's license. Anyone appearing on behalf of a licensee, except an attorney licensed to practice law in New York, must be prepared to present documentation showing that they are authorized to appear for the licensee.

Licensees may be represented by attorneys to represent them. Be advised that no adjournments will be granted due to your failure to obtain counsel. The hearing will proceed whether or not you have obtained counsel or other representation.

How to Settle a Violation Without a Hearing

If you submit one of the following pleas, your plea will be forwarded to the Members of the Authority without a fact finding hearing.

No Contest Plea: A No Contest plea is a plea whereby the licensee does not contest the charges (pleads guilty) and waits for the penalty to be determined by the Members of the Authority.

Conditional No Contest Plea (CNC): A Conditional No Contest plea is a plea whereby the licensee agrees to not contest the charges (pleads guilty) if the Members of the Authority accept the licensee's proposed penalty.

In order to be accepted, a CNC must be in writing and the Office of Counsel must determine that (1) the licensee's proposal adequately addresses the charged violations and (2) the penalty is appropriate to submit to the Members of the Authority.

If your Conditional No Contest Plea is accepted by the Office of Counsel, your hearing will be cancelled and your plea will be submitted to the Members of the Authority for ultimate determination.

Setting up your USB Mini modem for faxing in Mac OS X v10.6 or later, including v10.8 (Mountain Lion)

If you have not done so, connect the modem to your computer

1. Connect a cable from the modem to a USB port on the side of or back of your computer (Note: Do not use the USB port on the keyboard).
2. Connect the phone cord from the modem to the supplied phone cord and plug the other end of the cord into the wall telephone jack.

Add the modem as a fax/printer device

Note: The following steps assume you will be using Mac OS X's built-in fax capability. If you have third-party fax software such as Capuchin, please refer to the user guide downloaded from the online FAQs for information on setting up your modem under that software.

1. From the Apple menu, select **System Preferences** and then click **Print & Scan** (or **Print & Fax**). If you see a message saying that an installation of printing has been cancelled, click **Open Network Preferences** and then click **Apply**.
2. The **Print & Scan** or **Print & Fax** preferences screen opens. Click the + symbol (plus) on the left

Statement of HIPAA Portability Rights

Pre-existing condition exclusions: Some group health plans restrict coverage for medical conditions present before an individual's enrollment. These restrictions are known as "pre-existing condition exclusions." A pre-existing condition exclusion can apply only to conditions for which diagnosis, bleeding, advice or treatment was recommended or received within a 6-month period ending on your enrollment date. You can also have other pre-existing condition exclusions applied to you, but not for more than 12 months (18 months if you are late enrollees). Finally, a pre-existing condition exclusion can only apply to pregnancy and cannot apply to a child who is enrolled in health coverage within 30 days after birth, adoption, or placement for adoption. If a plan imposes pre-existing condition exclusion, the length of the exclusion must be reduced by the amount of your prior creditable coverage. Most health coverage is creditable coverage, such as group health plan coverage, COBRA continuation coverage, coverage under an individual health policy, Medicare, Medicaid, State Children's Health Insurance Program (SCHIP), and coverage through high-risk pools and the Peace Corps. You will further establish creditable coverage and may need to provide certification, if you do not receive a certificate for past coverage, talk to your new plan administrator, even if one is required. You can also ask your creditable coverage provider(s) if you have. However, if at any time you went for 63 days or more with no creditable coverage (called a break in coverage), a plan may not have to count the coverage you had before the break. Therefore, once your coverage ends, you should try to obtain alternative coverage as soon as possible to avoid a 63 day break.

Right to get special enrollment on another plan: Under HIPAA, if you lose your group health plan coverage, you may be able to get into another group health plan for which you are eligible (such as a spouse's plan) even if the plan generally does not accept late enrollees, if you request enrollment within 30 days. (Additional enrollment rights are triggered by marriage, birth, adoption, and placement for adoption.)

Therefore, once your coverage in a group health plan ends, if you are eligible for coverage in another plan (such as spouse's plan), you should request special enrollment as soon as possible.

Prohibition against discrimination based on health factor: Under HIPAA, a group health plan may not keep you (or your dependents) out of the plan based on anything related to your health. Also, a group health plan may not charge you (or the dependents) more for coverage based on health than the amount charged a similarly situated individual.

Anissa+Cedric

These two adorable love birds met while they were in elementary school! Fast forward to a few years later and they are ready to start their lives together as husband and wife at Bridle Oaks! They have such a sweet energy about each other and it was obvious to see how much they both like to take care of each other

They picked Lou Gardens as the backdrop for their engagement photos not only because it's absolutely gorgeous but because this was the spot where Anissa those rustic things hence why she has chosen Bridle Oaks as her venue for the wedding! I love it when couples choose a location that is personal to them There were tons of bright flowers blooming this time of year and the weather was just perfect We had so much fun wandering around together and enjoying the great scenery

Enjoy some of my favorite images from their engagement session below!

America's Best™, Excalibre™, Graph-Ex™ Inoculants in Organic Production

All **America's Best Inoculant®** products contain non-GMO Rhizobia strains and are selected or derived through natural production methods. There are several formulations of **America's Best Inoculant®**, including the following:

America's Best Inoculant® Non-Sterile liquid soybean inoculant is a peat-based product containing three naturally selected, non-GMO strains of *Bradyrhizobium japonicum*. The peat is the non-sterile formulant is selected, ground and dried. A blend of the three Rh cetsum strains is then mixed with the peat medium. **The Non-Sterile formulation has not been altered with irradiation. There is no** glycerin, chemical sticker or adhesion agent in the Non-Ster le formulat on.

Caution: The name America's Best Inoculant® Non-Sterile Peat formulation is most often confused for organic production.

Other formulations of **America's Best Inoculant®** include the following:

America's Best Inoculant® Sterile products have the same attributes as the Non-Ster le products, except that the peat and liner packaging have been sterilized with gamma or e-beam irradiation to control contamination and subsequently inoculated with a pu e culture of Rh zobia

America's Best Inoculant® Sterile Liquid formulations are formulated and packaged under sterile conditions with strains matching those detailed above. The liquid formulations are available for soybeans, peanuts and peanuts.

MegaPack™ for Soybeans is a high concentrate of **America's Best Inoculant®** liquid formulation for use on soybeans.

Excalibre™ Encapsulated Inoculant, Graph Ex® Inoculant Seed Lubricant, and **Graph-Ex® 5 Ink** Inoculants are again based on non GMO Rhizobia strains with a natural, p edominantly cellulose carrier. **Excalibre™** is for use on soybeans and **Graph-Ex®** is for use on soybeans

Products are tested for purity and attainment of guaranteed Rhizobial number

SabrEX ™ line of products, Excalibre-SA™, Nemaster® Soybean Inoculant System, Naturall™ for Vegetables and Graph-Ex SA line of products in Organic Production

The following products are currently being marketed by ABM™

SabrEx™ Bioat Inoculant line of products contain non-GMO Trichoderma microbial strains, selected or derived through natural production methods. It is available for Wheat/Cereals, Corn (commercial, sweet corn, popcorn), and Cotton. It is available in three formulations.

THE SIDE GRAFT

Two stocks each have been side grafted to produce the single whip-tongued stock at left. To make a side graft: cut stock and scion at matching 45 angles, then join the two quickly, making sure their inner vascular rings touch (below). Fasten with rubber ties or cactus spines if further support is needed. Treat with a soft coat. Keep out of direct sun until the joint starts to heal, usually two to four weeks, then remove the tape

Commands should be performed on the active ones, and you can find this information by doing the following command. This command will show the health of the system. From the display below, you can see that the state of this unit is "Active". The Cluster Health is at 100 in the "Health" status and the health is 100. Both units should normally be at health=100 and if not then the "display alarms" should be done to see if any alarms are current.

Here is an example of a problem with one of the nodes. Lasvms02a is down right now, so the health of lasvms02b shows that the "Node Status" is unmanaged and "SIP Synchronized" and "Data" is not. Our Office site

General Care

- To reduce pain: have your child rest in an upright position. Hot or cold compresses held against the ear may help relieve pain.
2. Keep the ear dry. Have your child wear a shower cap when bathing.
3. Avoid smoking near your child. Smoking has been shown to increase the incidence of ear infections in children.

Follow Up

As advised by the doctor or clinic staff.

Special Notes To Parents:

If your child continues to get earaches, the doctor may talk to you about inserting small tubes in the child's eardrum to help prevent fluid buildup. This is a simple and effective surgical procedure.

Get Prompt Medical Attention

If any of the following occur:

- Fever greater than 100.4°F (38°C) oral
- New symptoms, especially swelling around the ear or weakness of face muscles
- Severe pain
- Infection that seems to get worse, not better

Absolute Best Ever Lasagna

by rutherbeswimmin' on May 18 2002

★★★★★ 426 Reviews

Prep Time: 1 hr 30 mins Total Time: 2 hrs 10 mins Servings: 10-12

About This Recipe

"My fam b's favorite. This is a very meaty lasagna. We prefer it with cottage cheese, but you can easily substitute ricotta."

Photo by carmensk ichelt

Ingredients

- 1 1/2 lbs lean ground beef
- 1/2 lb Italian sausage
- 1 large onion, chopped
- 2 garlic cloves, minced
- 1 teaspoon salt (or to taste)
- 1 tablespoon dried parsley flakes
- 1 tablespoon dried oregano
- 1 tablespoon dried basil
- 2 (14 1/2 ounce) cans whole tomatoes, undrained and chopped
- 2 (6 ounce) cans tomato paste
- 24 ounces cottage cheese or 24 ounces ricotta cheese
- 2 eggs, beaten
- 1/2 teaspoon pepper
- 2 tablespoons parsley
- 1/2 cup grated parmesan cheese
- 1 lb mozzarella cheese, divided
- 12 -15 lasagna noodles

Directions

1. Brown ground beef, Italian sausage, onion and garlic.
2. Add salt and next 5 ingredients, stirring until well mixed.
3. Simmer 1 hour.
4. Cook lasagna noodles according to package directions, drain and set aside.
5. Spray a 13 x 9" baking pan with cooking spray.
6. Combine cottage cheese, eggs, pepper, 2 tablespoons parsley, Parmesan cheese and 1/2 of mozzarella cheese. In a lasagna pan, layer noodles, meat sauce, and cheese mixture, repeat.

We've noticed a survey Add info@zoomrx.com to your address book.

Hello Dr

Thank you so much for your valuable participation in the ZoomRx surveys.

Our mRx app is now fully compatible with Apple's latest operating system iOS 7. Please upgrade to the latest version from App Store now.

How to upgrade :

1. **Uninstall the current app**: Hold finger over current app on your device > select "x" on top left corner
2. **Download latest version from Appstore**: Search for "ZoomRx" in the App Store and Install
3. **Login**: Login using the email

The update addresses a compatibility issue with the ZoomRx app caused by Apple's most recent iOS upgrade. We appreciate for your inconvenience caused.

We look forward to your continued participation in ZoomRx surveys.

Sincerely,

The ZoomRx Team

****Upon login with latest version, you will be asked whether ZoomRx can access your microphone. Please SELECT 'OK'. If you click on 'Don't Allow' you will be unable to complete the survey.**

Pumpkin Spice Cake with Caramel Sauce

Penny Grendel

This is a very low fat, moist cake that is especially good around the Hohdays

1 box Spice Cake Mix (don t follow the directions on the box)

3 eggs

1 small can pumpkin (15 ounces)

¼ cup water

Put all ingredients in a bowl and mix well Bake in a greased 9x13 pan at 350 for 25-30 minutes until center is set.

Serve warm with Whipped Cream or Cool-Whip, and caramel sauce if desired.

Caramel Sauce

¼ cup butter

1 cup brown sugar

1 can of evaporated milk, 12 ounces

3 tbsp corn starch

Melt butter and sugar in a sauce pan until sugar is completely dissolved Let boil about 5 minutes. Wisk corn starch into milk and then add to sugar mixture Cook and stir until smooth and thickened Add a little water if it is too thick.

I attended hygiene school at the Forsyth Institute in Boston before attending dental school, I was surprised to read that a 2005 study at my alma mater discovered much higher levels of oral bacteria such as *C. gingivitis* and *P. melaninogenica*, and *S. mitis*, present in oral cancer patients

Several other studies also strongly suggest a link between the bacteria in your mouth and serious diseases. *Streptococcus mutans* is known to cause diseases such as pneumonia, meningitis and sinusitis to name a few. So, when there is clear evidence that many diseases and conditions are influenced by the mouth's ecology and bacteria, why hasn't oil pulling been encouraged by dental professionals as a supplemental therapy for patients? It's a valid question, after all we are in the business of "preventing" oral health problems, right? Not just fixing them? While it will likely draw some skepticism from some of my peers, I think it's a subject that merits further discussion among dental professionals.

Patient education

If patients embrace oil pulling as part of their daily teeth cleaning regimen, they should adhere to few guidelines:

- Swish gently. If your jaw starts aching after five minutes, slow down. You're working too hard!
- Do not swallow the oil while swishing. If you find it hard not to, you likely have too much oil in your mouth. Spit it out and try again with a smaller amount.
- Once you have finished pulling, spit the solution into the trash. Do not discard the oil in the sink or down the toilet because over time the oil may build up and clog the pipes.
- Do not drink anything before rinsing your mouth. Rinse with water first before consuming a beverage.

I truly believe that there isn't a more natural preventative rinse than oil pulling with refined coconut oil. When you consider the harsh chemicals in most mouthwashes, it makes the practice particularly appealing to me.

I believe actions speak louder than words. So my father and I have adopted oil pulling as part of our morning routine. It took a while to get used to it (I started at 10 minutes, three times week and now do 20 minutes three times week). I do love how my mouth

What can the pure theory of international
trade tell us about international migration?
I have long found it curious that although
migration is a central feature of the international
economy and has been for a long time
and although regional economists have devoted
considerable attention to the phenomenon,
it has never received from the pure
theory of international trade more than a
small fraction of the attention lavished on
the theory of international capital movements
no doubt part of the reason for this
is the widely appreciated fact that much of
the latter is in effect a theory of factor movements
if for no better reason than that nothing
which might distinguish one factor from
another is allowed to play a significant role
Thus, one might argue, we do in fact have a
significant literature on migration: all that is
necessary is that the word "capital" be replaced
by "labor" in much of the theory of
international capital movements. Indeed a
good part of what trade theorists have written
about migration has in effect done just
that, with labor distinguished in no essential
way from other factors. This approach to
migration is all to the good as far as it goes.
It does, after all, give us a useful theory and
it gives us that theory on the cheap. But
we are quite noticeably without a theory addressed
in any substantive way to those
aspects of migration that are distinctive
to it

GET YOUR NEW THIN CLIENT SYSTEM UP AND RUNNING

Congratulations—welcome to enhanced security, reduced cost, less risk and a system that's a whole lot easier to manage.

HP ThinPro thin clients help improve productivity with quick deployment of simple, familiar and more reliable computing experiences.

It's easy to get started

This quickstart guide illustrates some of the most common tasks of setting up an HP ThinPro thin client. It is designed to help you get up and running, right out of the box. However, if you have questions, need more information, or want to set up a more unique configuration, please refer to the HP ThinPro Administration Guide at **www.hp.com/support/manuals/thinclients**. Select your thin client and its respective guide under *General Reference*.

LOGGING ON AND GETTING STARTED

The HP ThinPro interface appears when you first turn on the thin client and defaults to User Mode.

User Mode

- Allows restricted rights to subset of access connection creation and control panel applications. Allows restricted rights to subset of access connection creation and control panel applications.

Administrator Mode

- Allows full access to control panel applets, manipulation of HP ThinState Capture and Deploy, FTP images, etc.
- Defines which connections and connection types are available when in User Mode and limits users on deleting connections or creating new ones.

Note. You must log in with administrator permissions to access all components of the HP ThinPro user interface. The default password for Administrator Mode is ***root.***

To switch between User and Administrator mode:

1. Click the HP logo in the bottom left of the screen.
2. Position your cursor in the screen background and right-click. Then select **Administrator/User Mode Switch**.
3. Enter your password.

Quick tip

To determine if you are in User or Administrator mode:

A blue banner at the top of the console window designates User Mode.

A red banner at the top of the console window designates Administrator Mode.

Mount remote ftp directory host locally into linux filesystem

1. Installation

[illegible] Debian [illegible] is as simple as:

[illegible]

2. Mount ftp directory

Whilst logged in as [illegible] create a mount point

[illegible]

next we need to find out if your local ftp [illegible] Suppose my access parameters are as follows

- username: ftp-user
- password: ftp-pass
- host/ip: my.host.com

the actual curlftpfs mount command would be:

[illegible]

Caution

ftpfs set-user-uid preserves file ownership and allows non-root users to modify files. It prevents users from putting programs on the FUSE file system that could be used to gain root access. It also prevents users from reading their own crontabs unless they have chown permission. Note that these restrictions are enforced by default only when allow_other has not been given. When neither is specified, or when the root user has given only allow_root, programs owned by users other than root may be executed, and those users can create cron jobs that will be run with root's privileges.

[illegible]

Read the man pages for more options. Be careful with the -o allow_other option. This option allows other users to access the mount directory and can cause big problems if not used correctly. For example, if you have a directory with a lot of files, such as /usr/src, and you run a command like find /usr/src -name "*.c" -print, then find will run as root and will print the names of all the files in /usr/src, including those that normally only root can read. If you then run a command like grep -r "password" /usr/src, then grep will run as root and will search all the files in /usr/src, including those that normally only root can read. If you then run a command like grep -r "password" /usr/src, then grep will run as root and will search all the files in /usr/src, including those that normally only root can read.

3. Mount ftp with curlftpfs using /etc/fstab

Since we do not want our ftp username and password to appear in the first create a root readable file with the following contents. Just [illegible]

[illegible]

Now change permissions of the file to 600

[illegible]

Check it all and give your non-root user. The user will have access to ftp mount directory

[illegible]

In the next step add a following line to your /etc/fstab file. [illegible]

[illegible]

No remount ftp

[illegible]

4. Mount ftp //sql64/sendfile to /mnt/ftp

```
# curlftpfs 10 0 0 105/sendfile /mnt/ftp
```

Zen Thinking

- The journey of a thousand miles begins with a broken fan belt and a leaky tire.

- Never test the depth of the water with both feet.

- Give a man a fish and he will eat for a day. Teach him how to fish, and he will sit in a boat and drink beer every weekend.

- Some days you're the dog ... and some days you're the hydrant.

- Don't worry ... it only seem kinky the first time.

Reply: Evolution, morality and the law: on Valerie J. Grant's case against sex selection

Sir,

In offering my article for publication (Grant, 2006), I was making a tentative suggestion to defer the decision on whether or not sex selection for social reasons should be permitted, until we know more about the processes of sex determination, or, as I argued, sex predetermination. But in his response to this idea, Dahl (In press) has leapt well into the future, to a place I had not yet imagined! And yes, I see the logic of his position. If, as I suggest, there is such a thing as sex predetermination in mammals, and if an adaptive, and possibly important, process underlies it, I should withdraw my objection to sex selection and instead argue in favour of it.

If my hypotheses were shown to be correct, it might indeed mean that fertility specialists would practise sex selection, simply to increase the chances of success. But the word 'social' would be the wrong one to describe this new preselection process; rather, this new process would need to be based on the physiological and psychological attributes of the mother-to-be. Consider, then, the case of a mother seeking to select the sex of her next child with a view to family balancing. If she had not changed along the relevant dimensions since her last pregnancy, she would be very unlikely to conceive a child at all. And if she did, it would probably mean that she would have conceived a child of the desired sex without any technical intervention.

Even though these hypothesized new processes for sex preselection could result in reducing the choices for parents of single-sex sibships, interventions that took into account the physiological and psychological attributes of the mother might increase conception rates in previously infertile women. At the present time, it could be that the low fertility rates following some common procedures (especially intracytoplasmic sperm injection) do not reflect a lack of technical expertise, but rather the possibility that the mother has some role in the predetermination and/or the ratification of the sex of her infant.

But all this is speculative and even if supported by research, it is some way into the future, especially for human sex selection.

Addiction

(feat. Cassie & Fabolous)

[VERSE 1]
You've got fashion and style
I'm lovin' your smile and
The way you get down
I can't see no one else
It's you by yourself, yea
In spite of the crowd
[Baby no one else matters]

[B-SECTION]
It started off with a kiss (uh huh)
Never expectin' this (uh huh)
And now I'm here copin' with
My addiction (addiction)
It started off with a kiss (uh huh)
Never expectin' this (uh huh)
And now I'm here copin' with
My addiction

While all the girls say

[HOOK]
I'm addicted to you
I'm addicted to you
I'm addicted to you
You're my addiction
I'm addicted to you
I'm addicted to you
I'm addicted to you
You're my addiction

[BRIDGE]
When I'm lookin' in the mirror
Honey, you are all I see
And it could not be no clearer
That I need you here with me

[VERSE 2]
I was hopin' you'd notice
The way that I like to
Have you around
Listen and you will find that
Your heart beats for me
Girl, I hear the sound

[B SECTION]
It started off with a kiss (uh huh)
Never expectin' this (uh huh)
And now I'm here copin' with
My addiction (addiction)

Hold on to this bunch until you get my termination dates from UT-Austin (the request is on tape on the digital); but, while we r waiting, call your contact at TIAA-CREF, tell them we're waiting for the Texas termination date and ask them how I have signed here anything that says that they will always re-invest any minimum distribution checks that come in. I ask you 2 ask them to show you in all these forms where such a request and such a signature might be. Because I do not see them and I want to be sure that I will not get huge checks once again. Many thanks, write the answr in Log Mesj Sectn

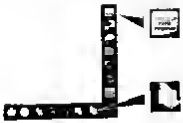
After this, Quick Menu opens automatically.
Quick Menu is a shortcut menu that lets you access functions you want to use with one click. You can access CREATIVE PARK PREMIUM, the Online Manual, etc.



* The screen display varies depending on your printer.

CREATIVE PARK PREMIUM

You can download popular characters or artwork of famous artists and print them. **CREATIVE PARK PREMIUM is a premium content service available exclusively to customers who use genuine Canon ink for all colors.**

Online Manual

The Online Manual is an instruction manual on the website. It contains the latest information needed for operations such as printing. You can also use it for troubleshooting when problems arise.

* An internet connection is necessary.

We Recommend Using Canon Genuine Inks

Canon genuine consumables (inks / printing paper) are developed especially for Canon ink-jet printers. We recommend using Canon genuine consumables to maintain printer performances and ensure consistency.

UNIVERSITE DE MONTRÉAL
FACULTÉ DE DROIT
2010- 2011

DRT 2505— Droit pénal 2
Deuxième année — Section Z
Professeur: Nicolas Bellemare

PLAN GÉNÉRAL

I. Description du cours

Ce cours est la deuxième partie d'un cours obligatoire de 6 crédits en droit pénal. Cette partie comporte une analyse de certains principes fondamentaux de notre système de justice répressive, de même qu'une étude des éléments essentiels de la preuve, de la procédure et de l'imposition de la peine. Ce cours de droit pénal permet ainsi de se familiariser davantage avec les fondements et les fonctions du droit pénal dans notre société.

L'étude de la jurisprudence est essentielle à la compréhension du droit pénal canadien. En effet, notre droit pénal demeure fortement influencé par la *common law* qui constitue toujours une source importante de celui-ci. Au surplus, la *Charte canadienne des droits et libertés* a un impact considérable dans ce domaine du droit. Pour maîtriser le droit pénal, il convient donc de l'apprendre à partir de la jurisprudence qui le façonne et d'extrapoler, le cas échéant, les principes qui se dégagent à partir des cas d'espèce.

II. Objectifs du cours

Compte tenu des paramètres de contenu, des lectures qui seront faites et des activités qui se dérouleront en salle de cours, les étudiantes et les étudiants, à la fin du cours, seront capables :

1) d'identifier les caractéristiques fondamentales du système canadien de justice pénale;

2) de cerner les droits des citoyens à l'occasion de l'exercice par la police de certains pouvoirs reliés à la cueillette de la preuve, l'arrestation et l'interrogatoire des suspects;

3) de comprendre les différentes phases du processus judiciaire et le rôle de ses principaux intervenants;

4) d'identifier certains principes gouvernant l'administration de la preuve dans un procès pénal;

5) de comprendre les règles et principes touchant le choix et la détermination de la peine.

hello nicce

Long before Newfoundland joined Canada,the Newfies never went to school, as they had no need to; as they were destined to become fishermen

But one defied custom and became a poet. Here is one which he wrote

DE SPRING IS SPRUNG, DE GRASS IS RIZ

I WONDER WHERE DE FLOWERS IS

DE BIRD IS OH DE WING,

BUT THATS ABSURD

I ALWAYS THOUGHT DE WING WAS ON DE BIRD.

MY LOVE HAS FLOWN,

HER DONE ME DIRT

I ALWAYS KNEW HER WERE A FLIRT.

TO ALL WHO LOVE, TAKE HEED I BID:

OR YOU'LL BE DONE,

LIKE I WAS DID!!"

Author," goofie - Newfie"

Russ gave this to me (Terry) shortly before he died.

1 **Connect the power cord between the product and a grounded AC outlet.** Make sure the power source is adequate for the printer voltage rating. The voltage rating is on the product label. The product uses either 110–127 Vac or 220–240 Vac and 50/60 Hz
CAUTION: To prevent damage to the product, use only the power cord that is provided with the product.

2 **OPTIONAL.** To enable job-storage printing, insert a USB thumb drive into the back USB port. The drive must be USB 2.0 or later with a minimum of 16 GB of memory
NOTE Do not plug in the printer USB cable at this time.

3 **Turn on the printer power**

Questions and Answers

What is Direct Deposit?
With direct deposit, sometimes called electronic fund transfer or EFT, we send your payment straight to your bank account. It gives you immediate access to your money the day your payment is due. It also eliminates the risk of lost or stolen checks, forged signatures and identity theft.

Why can't I continue to receive my paper check?
The U.S. Department of the Treasury established rules for DFAS and other government agencies to comply with a law that requires all federal payments to be made electronically, instead of by mailed paper check, by March 1, 2013. The change is mandated by 31 U.S.C. 3332 and Title 31, Part 208 of the U.S. Code of Federal Regulations.

How long will it take for direct deposit to start after I apply?
Depending on how you enroll, it can take 30 to 60 days from the day we receive your enrollment for direct deposit to start. Please call or mail your form by January 1, 2013 to avoid missing the mandatory direct deposit deadline.

How will I know when my direct deposit has taken effect?
It can take 30 to 60 days from the day we receive your enrollment for direct deposit to start. If after enrolling you receive a paper check, please cash or deposit it as you normally would. We will send you a notification when we process your enrollment. By the time you not ce your paper checks have stopped arriving, your first electronic payment should already be in your bank. Check your bank statement or contact your bank on pay day to see if your pay was deposited. Please do not call DFAS to ask if your payment was deposited.

Is this safe? I'm worried about the security of my money and my bank account.
Yes, direct deposit is more secure than paper check. Over 99 percent of military retirees and over 96 percent of annuitants already receive their payments through direct deposit. It eliminates the risk of your check being lost or stolen in the mail, signatures being forged or your personal information being compromised.

I don't have a bank account. What bank do you recommend?
As a federal agency, we cannot endorse banks or other businesses. Find a bank or credit union in your area that is reputable and provides the services you need at little or no cost. And make sure they offer FDIC coverage of your account and accept direct deposit. It's the best way you can take control of your finances and protect yourself at the same time.

What if I don't comply?
DFAS is working on a debit card alternative for customers who do not have bank accounts. We will monitor whether your payment is converted to direct deposit and if you fail to comply, we reserve the right to switch your payment to a debit card account automatically. We will provide more information on the debit card as it becomes available at www.dfas.mil/mandatoryeft.html.

This is the top line

When in the Course of human events, it becomes necessary for one people to dissolve the political bands which have connected them with another and to assume among the powers of the earth, the separate and equal station to which the Laws of Nature and of Nature's God entitle them, a decent respect to the opinions of mankind requires that they should declare the causes which impel them to the separation.

We hold these truths to be self-evident, that all men are created equal, that they are endowed by their Creator with certain unalienable Rights, that among these are Life Liberty and the pursuit of Happiness.--That to secure these rights Governments are instituted among Men deriving their just powers from the consent of the governed, -- That whenever any Form of Government becomes destructive of these ends, it is the Right of the People to alter or to abolish it and to institute new Government, laying its foundation on such principles and organizing its powers in such form, as to them shall seem most likely to effect their Safety and Happiness Prudence, indeed, will dictate that Governments long established should not be changed for light and transient causes, and accordingly all experience hath shewn, that mankind are more disposed to suffer while evils are sufferable, than to right themselves by abolishing the forms to which they are accustomed. But when a long train of abuses and usurpations, pursuing invariably the same Object evinces a design to reduce them under absolute Despotism, it is their right, it is their duty, to throw off such Government and to provide new Guards for their future security --Such has been the patient sufferance of these Colonies, and such is now the necessity which constrains them to alter their former Systems of Government The history of the present King of Great Britain is a history of repeated injuries and usurpations, all having in direct object the establishment of an absolute Tyranny over these States. To prove this, let Facts be submitted to a candid world.

He has refused his Assent to Laws, the most wholesome and necessary for the public good.
He has forbidden his Governors to pass Laws of immediate and pressing importance unless suspended in their operation till his Assent should be obtained and when so suspended, he has utterly neglected to attend to them
He has refused to pass other Laws for the accommodation of large districts of people unless those people would relinquish the right of Representation in the Legislature a right inestimable to them and formidable to tyrants only
He has called together legislative bodies at places unusual uncomfortable and distant from the depository of their public Records, for the sole purpose of fatiguing them into compliance with his measures.
He has dissolved Representative Houses repeatedly for opposing with manly firmness his invasions on the rights of the people.
He has refused for a long time after such dissolutions, to cause others to be elected, whereby the Legislative powers, incapable of Annihilation, have returned to the People at large for their exercise, the State remaining in the mean time exposed to all the dangers of invasion from without, and convulsions within
He has endeavoured to prevent the population of these States for that purpose obstructing the Laws for Naturalization of Foreigners refusing to pass others to encourage their migrations hither, and raising the conditions of new Appropriations of Lands

15.40 2,6-Dichlorophenol has been isolated from the females of two species of ticks (*Amblyomma americanum* and *A. maculatum*), where it apparently serves as a sex attractant. Each female tick yields about 0.5 μg of 2,6-dichlorophenol. Assume that you need larger quantities than this and must use a synthesis of 2,6-dichlorophenol from phenol. (*Hint*: When phenol is sulfonated at 100°C the product is chiefly *p*-hydroxybenzenesulfonic acid.)

Hello World!

External Serial Modems

Almost without exception external serial faxmodems will work with HylaFAX. External modems are nice because they generally have some type of display which indicates activity. This can be useful when troubleshooting. External modems use external power sources and rabling so it is important that they be located where they are not likely to be bumped or jostled. Because the modem can be power-cycled independently there is some risk of the modem "losing" its initialization and staying uninitialized if care is not taken to address that scenario (usually by "writing" the initialized state to be used by default after a reset). However this also can be useful in that a hung modem may be power-cycled without rebooting the server. Unless you are using external modems on a multiport serial card (you're using the system board's built-in serial ports) and because HylaFAX's fairly continually accessed the modem (unable to share the IRQ) you are generally limited to a combination of only two external serial or internal ISA faxmodems.

Internal ISA Hardware (Jumpered or PnP) Modems

As with external serial modems internal ISA hardware faxmodems work with HylaFAX almost without exception. There have been a few of power or date rabies being jostled with internal modems. But there are no lights to display. Either and power-cycling a hung modem or system reboot. Because non-PnP hardware ISA modems use the same memory addresses and IRQs as external serial modems the same limitation to only two applies. However if your system supports Plug-n-Play then ISA hardware PnP faxmodems will likely work as well and these PnP modems may provide a means to go beyond that limitation. As routine when purchasing a new ISA system since many new ISA modems are Windows-software driven and do not have a hardware serial controller. Consequently it may not be able to be "spoken" to or nothing above. US Robotics/3Com ISA Winmodems are a good example of what not to buy.

Autism

- Affects a person's ability to communicate and interact socially
- Is the fastest growing developmental disability in the U.S.
- Occurs in as many as 1 in 68 births
- Is more prevalent than Down's Syndrome, childhood diabetes, and childhood cancer combined
- Has an estimated annual cost of $90 billion

Did you know?

- There is no genetic marker or medical test for autism.
- It affects boys more than girls by a ratio of 4:1.
- The cause of autism is unknown, there is no cure

There is room for hope and answers

- Autism can be diagnosed by age three sometimes as early as 18 months.
- There are evidence based treatments that help.
- Early diagnosis/intervention offers greater opportunity in life
- Adults with autism are capable of working in a wide range of jobs

ORGANIZATION FOR AUTISM RESEARCH

The Organization for Autism Research (OAR) is a national non-profit that uses research to help families, educators, caregivers, and individuals with autism find answers to their immediate questions. OAR provides timely and relevant resources, funds studies that have the potential to enhance quality of life, and is an active partner in the autism community

OAR's mission is to apply research to the challenges of autism. To that end, it

- Focuses on applied research—scientific examination that focuses on the challenges faced by children and adults with autism and their families
- Is the only autism organization with this exclusive focus

To give to OAR, please go to [donation link] or send checks made payable to OAR to: 2000 N. 14th Street Suite 240, Arlington VA 22201

What is Retin-A

Retin-A (tretinoin topical) is used to treat acne and reduce wrinkles.

Generic Name	tretinoin topical
Drug Class	topical acne agents
Brand names	Retin-A, Atralin, Avita, Renova
Dosage forms	gel, cream, pump
How it works	Retin-A treats pimples and the skin to help prevent clogged pores, new pimples from forming, and help prevent future breakouts.
Patient feedback	I've used many different products to treat my acne, but Retin-A is the only one that has ever worked. I've been using it for about a month now and my skin is clearer than it has been in years. I highly recommend it to anyone struggling with acne. 10/10 will buy again! Jayme on December 16, 2014

Welcome to

Windows® Fax and Scan

One place to scan and fax your documents

FAX You can send and receive faxed documents on your computer without using a fax machine. You can also print, e-mail, or save a copy of your faxes.

To get started:

1. Connect a phone line to your computer.

   If your computer needs an external modem, connect the phone to the modem, and then connect the modem to your computer.

2. On the toolbar, click **New Fax**.

3. Follow the instructions in the setup wizard to connect to a fax modem, and then, when you're finished, create your fax.

To connect to a fax server instead of a modem, contact your system administrator. For more help with faxing, click the **Help** button on the toolbar.

SCAN After you add a scanner to your computer, you can preview documents or pictures before you scan them, and then adjust your scan settings for better results. You can also fax or e-mail scanned files to someone else.

To get started:

1. Connect your scanner to your computer by following the instructions that came with your scanner, and then place a document or picture on the scanner.

2. In Windows Fax and Scan, at the bottom of the left pane, click **Scan**.

3. On the toolbar, click **New Scan**.

4. Choose the scan settings you want to use, and you're ready to scan.

Use the options on the toolbar to fax, e-mail, print, or copy scans at any time. For more help with scanning, click the **Help** button on the toolbar.

General Instructions

Purpose of form. Use this form only if the recipient has not given you a valid taxpayer identification number (TIN) or if you think the TIN they gave you may be incorrect. See *What Is Backup Withholding?* on page 1.

Tip. Use Pub. 1220, Specifications for Electronic Submission of Information Returns, to request copies of the IRS publications mentioned in these instructions. See Pub. 1220 for information on electronic filing of information returns.

If you are requesting this form from someone who is not a recipient or payer (for example, your customer or client), you may want to explain why you need the information. See the chart below for examples.

If you are requesting this form from a recipient, you may want to explain why you need the information. For example, you may need the recipient's TIN to report interest, dividend, or certain other payments made to the recipient. Otherwise, you may be required to withhold a portion of such payments and pay it to the IRS as backup withholding.

Automated transcript request. You can get a free copy of your tax account transcript or a copy of certain information returns by calling 800-908-9946 and following the prompts. You can also order a transcript online at www.irs.gov/orderatranscript. You should receive your transcript within 10 business days after we receive your request.

Line 1b. Enter your own telephone number here. Be sure you can be reached at this number between 8 a.m. and 4:30 p.m. local time during the tax year. We may call you if we need more information.

Line 2. Enter the name shown on the tax return for the person or entity whose name is entered on line 1b. Enter a business name/DBA name on line 2 if you used it when filing the return.

Line 3. Enter the type of tax return filed and the specific form number(s) of the return(s) that you believe were filed and that you are requesting. For example, enter "Form 1040," "Form 1040A," "Form 1120," "Form 941," "Form 720," or "Individual Income Tax."

Line 4. Enter the year(s) for the return(s) that you are requesting. Requests can be made for any year(s) during the past 10 years.

Line 5a. Enter the address that you used when you filed the return(s) listed on line 3 for the year(s) listed on line 4. If you used a P.O. box when you filed the return(s), enter the P.O. box. If your address has changed since you filed the return(s), enter your current address.

Line 5b. Enter your city, state, and ZIP code. If your address is outside the United States or its possessions or territories, enter the information in the following order: city, province or state, and country. Follow the country's practice for entering the postal code.

Signature and date. Form 4506-T must be signed and dated by the taxpayer listed on line 1a or 2a. If you filed a joint return, at least one spouse must sign. If you are not the taxpayer listed on line 1a or 2a, you must have the authority to sign for the taxpayer (see *Third Party Authorization* on page 1) and you must provide documentation of your authority.

Power of attorney. If you want to authorize someone else to receive the transcript or tax information, you can list that person as your representative on Form 2848, Power of Attorney and Declaration of Representative, or Form 8821, Tax Information Authorization. Form 2848 authorizes an individual to represent you before the IRS, while Form 8821 allows an individual or organization to receive your confidential tax information. Both forms require your signature and date, and the representative must sign and date the form. For more information, see Pub. 947, Practice before the IRS and Power of Attorney.

Privacy Act and Paperwork Reduction Act Notice. We ask for the information on this form to carry out the Internal Revenue laws of the United States. You are required to give us the information. We need it to ensure that we are processing your request and to be able to provide you with the correct information. Code sections 6103 and 6109 and their regulations require you to provide this information, even if you no longer have an interest in the property. Failure to provide a taxpayer identification number or to sign the form may subject you to penalties. Routine uses of this information include giving it to the Department of Justice for civil and criminal litigation, and cities, states, the District of Columbia, and U.S. commonwealths and possessions for use in administering their tax laws. We may also disclose this information to other countries under a tax treaty, to federal and state agencies to enforce federal nontax criminal laws, or to federal law enforcement and intelligence agencies to combat terrorism.

You are not required to provide the information requested on a form that is subject to the Paperwork Reduction Act unless the form displays a valid OMB control number. Books or records relating to a form or its instructions must be retained as long as their contents may become material in the administration of any Internal Revenue law. Generally, tax returns and return information are confidential, as required by Code section 6103.

The time needed to complete and file Form 4506-T will vary depending on individual circumstances. The estimated average time is: Learning about the law or the form, 10 min.; Preparing the form, 16 min.; and Copying, assembling, and sending the form to the IRS, 20 min.

If you have comments concerning the accuracy of these time estimates or suggestions for making Form 4506-T simpler, we would be happy to hear from you. You can write to: Internal Revenue Service, Tax Products Coordinating Committee, SE:W:CAR:MP:T:T:SP, 1111 Constitution Ave. NW, IR-6526, Washington, DC 20224. Do not send the tax form to this address. Instead, see *Where to File* on page 2.

PDF INFO & TEST FILE

SOMETHING FOR FREE!

The PDF (Portable Document Format) requires a special stand-alone application, or plug-in for your Web browser to view PDF documents. The basic software is available free from the Adobe Corporation. The free Adobe(R) Acrobat(R) Reader allows you to view, navigate and print PDF files across all major computing platforms. Acrobat Reader is the free viewing companion to Adobe Acrobat 3.0 and to Acrobat Capture(R) software. All links to PDF files I have set beside them or (PDF) in the text link.

If you do not have Adobe(R) Acrobat(R) Reader software, it is available free from Adobe Inc. by clicking the Get Acrobat Reader at http://www.adobe.com/prodindex/acrobat/readstep.html"

A more sophisticated yet more costly software package called Adobe Acrobat provides the tools for the creation, manipulating and indexing of PDF files. It is available as a commercially sold product from Adobe. This software package is available through most software retailers.

WHY I USE PDF FILES

I frequently get inquiries about my use of PDF files on my Website. I use them for several reasons:

- I can deliver all my documents with their quality graphics and page formatting.
- PDF files can be downloaded relatively quickly.
- They are compact in size compared to other forms of electronic documents of comparable quality.
- I can create high quality documents more easily than using HTML (Hyper Text Markup Language). Differences in our Web software packages and graphics software can make it more difficult to create PDF files.
- They can be used with the same predictable results on five computer platforms and operating systems (UNIX, Windows 3.1, 95, 98 & NT, Macintosh).

« How to Stop a Calls from a Fax Machine?
How to Fix Vertical Strips On Faxes I Send

How Can I Test My Fax Machine?

I just hooked up a new fax machine and I'd like to test it just to make sure it works. How can I do that?

Presumably you want to test your fax machine by sending a fax from it and receiving a fax with it. Here's how to do both

To test the send functionality of your fax machine, send a free fax to 1-855-330-1239 (a toll free number in the United States). When it's finished transmitting, point your web browser to Fax.Zoo. It's a fun web site that displays whatever is faxed to that number. Wait a minute, your fax should appear on the site. Click the thumbnail to see a large version

To test the receive functionality of your fax machine, point your web browser to FaxZero. From this site, let's you send faxes for free to anywhere in the United States and Canada. Within a few minutes, your fax machine should ring — hopefully it will automatically answer and spit out the test fax

Antioxidant hope for Parkinson's

[illegible]
Study suggests apocynin may prevent onset

The antioxidant apocynin may hold promise for preventing Parkinson's disease, according to new research findings.

Researchers involved in a study published offers hope for people suffering from Parkinson's disease, according to a research by from the Medical College of Wisconsin.

The study, which focuses on the antioxidant apocynin, appears in the May 28, 2013 edition of *Neuroscience Letters* and was noted on sciencedaily.com

Nearly one million Americans suffer from Parkinson's disease, a chronic and progressive movement disorder in which the nerve cells in the Parkinson's Disease foundation. More people have the disease than the combined number of people diagnosed with multiple sclerosis, muscular dystrophy and Lou Gehrig's disease. Approximately 60,000 Americans are diagnosed with Parkinson's every year.

Researchers studied the effects of an experimental drug named, a synthetic molecule derived from apocynin, a naturally occurring compound, on a population of mice. In one particular type of mouse called LRRK2[illegible], rodents lose coordinated movements and develop Parkinson's-type symptoms by the time they're 10 months old. Researchers began giving diapocynin to the mice when they were 12 weeks old. The treatment prevented the expected deterioration in motor coordination, according to the release.

"These early findings are encouraging, but in this model, we still do not know how this molecule exerts neuroprotection. Further studies are necessary to discover the exact mode of action of the diapocynin and other molecules with a similar structure," said the study's lead author Balaraman Kalyanaraman, [illegible].

New research suggests that phenylbutyrate, currently available as a supplement and thought to improve cognition in older people, may also help fight Parkinson's disease and other degenerative brain disorders. Read more here

Hail Mary

Today begins the 90th Anniversary of the apparition of the Virgin of Fatima

When you receive this email say a Hail Mary and ask for a special favor

"Hail Mary, full of grace, The Lord is with thee. Blessed art thou among women and blessed is the fruit of thy womb, Jesus. Holy Mary, Mother of God, pray for us sinners, now and at the hour of our death, Amen." (your request)

Please do not break the Novena , send it to 12 people you think deserve justice, peace, love, health, prosperity and truth. When you are down to nothing, God is up to something. This has been traveling since 5/13/07!
